### NEW SOUTH WALES RECORDED CRIME STATISTICS

Quarterly Update March 2017

NSW
Statistical Areas
and
Local Government Areas

### **REVISED EDITION**

This is a revised edition of the original report. The revision was created in September 2018 to incorporate updates to the historic counts of murder and drug possession offences. The murder revisions have increased the number of murder victims by 4% between 2011 and 2017. The drug possession revisions have resulted in a 25% reduction in the volume of these offences from 2010 due to some incidents previously being double counted.

**NSW Bureau of Crime Statistics and Research** 

### **CONTENTS**

SECTION 1:	OVERVIEW OF TRENDS IN RECORDED CRIME, BY OFFENCE TYPE	3
Table 1.1	Trends in recorded criminal incidents for major offences, over the 60 months to March 2017, NSW	4
Table 1.2	Number and trends in recorded criminal incidents for 62 offences, over the 24 months to March 2017, NSW	5
SECTION 2:	TRENDS, RATE COMPARISONS AND RECORDED CRIMINAL INCIDENTS FOR MAJOR OFFENCES, NSW REGIONS AND LGAS	7
Table 2.1A	Trends in recorded criminal incidents for major offences, over the 24 months to March 2017, NSW SAs	8
Table 2.1B	Ratio to NSW rate of recorded criminal incidents per 100,000 population for major offences, over the 12 months to March 2017, NSW SAs	8
Table 2.1C	Number of recorded criminal incidents for major offences, over the 12 months to March 2017, NSW SAs	9
Table 2.1D	Number of recorded criminal incidents for major offences, over the 12 months to March 2016, NSW SAs	9
Table 2.2A	Trends in recorded criminal incidents for major offences, over the 24 months to March 2017, Greater Sydney SAs	10
Table 2.2B	Ratio to NSW rate of recorded criminal incidents per 100,000 population for major offences, over the 12 months to March 2017, Greater Sydney SAs	10
Table 2.2C	Number of recorded criminal incidents for major offences, over the 12 months to March 2017, Greater Sydney SAs	11
Table 2.2D	Number of recorded criminal incidents for major offences, over the 12 months to March 2016, Greater Sydney SAs	11
Table 2.3A	Trends in recorded criminal incidents for major offences, over the 24 months to March 2017, NSW LGAs	12
Table 2.3B	Ratio to NSW rate of recorded criminal incidents per 100,000 population for major offences, over the 12 months to March 2017, NSW LGAs	14
Table 2.3C	Number of recorded criminal incidents for major offences, over the 12 months to March 2017, NSW LGAs	16
Table 2.3D	Number of recorded criminal incidents for major offences, over the 12 months to March 2016, NSW LGAs	18
SECTION 3:	METHODS OF PROCEEDINGS AGAINST ALLEGED OFFENDERS	21
Table 3	Number of alleged offenders recorded by NSW Police Force by method of legal proceedings, over the 24 months to March 2017, NSW	23
APPENDIX:	APPENDIX 1: TRENDS IN RECORDED CRIMINAL INCIDENTS IN NSW	25
	APPENDIX 2: DEFINITIONS AND EXPLANATORY NOTES	26
	APPENDIX 3: BOCSAR OFFENCES MAPPED TO POLICE INCIDENT CATEGORY	29
	APPENDIX 4: NSW & GREATER SYDNEY STATISTICAL AREA MAPS	35
	APPENDIX 5: LGAS IN GREATER SYDNEY STATISTICAL AREAS	37
	APPENDIX 5: LGAS IN NSW REGIONAL STATISTICAL AREAS	38

# SECTION 1: OVERVIEW OF TRENDS IN RECORDED CRIME BY OFFENCE TYPE NSW

TABLE 1.1: TRENDS<sup>^</sup> IN RECORDED CRIMINAL INCIDENTS FOR MAJOR OFFENCES

OVER THE 60 MONTHS TO MARCH 2017, NSW

Offence category	Trend result and annual percentage change over the last 24 months	Trend result and average annual percentage change over the last 60 months
Murder *	Stable	Stable
Domestic violence related assault	Stable	Stable
Non-domestic violence related assault	Stable	Down by 2.6%
Sexual assault	Stable	Up by 2.4%
Indecent assault, act of indecency and other sexual offences	Stable	Up by 4.4%
Robbery without a weapon	Stable	Down by 15.3%
Robbery with a firearm	Stable	Down by 17.7%
Robbery with a weapon not a firearm	Down by 10.9%	Down by 12.3%
Break and enter dwelling	Down by 5.9%	Down by 7.6%
Break and enter non-dwelling	Stable	Down by 7.7%
Motor vehicle theft	Stable	Down by 6.8%
Steal from motor vehicle	Stable	Down by 3.1%
Steal from retail store	Stable	Up by 1.7%
Steal from dwelling	Stable	Stable
Steal from person	Down by 15.2%	Down by 12.2%
Fraud	Down by 4.3%	Stable
Malicious damage to property	Stable	Down by 6.3%

<sup>^</sup> For further explanation of trend results, see page 25, Notes [5] and [6].

<sup>\*</sup> For murder, the trend test is applied to the monthly number of recorded victims rather than criminal incidents.

TABLE 1.2: NUMBER AND TRENDS' IN RECORDED CRIMINAL INCIDENTS FOR 62 OFFENCES OVER THE 24 MONTHS TO MARCH 2017, NSW

			f recorded incidents		ver the last nonths

<sup>^</sup> For further explanation of trend results, see page 25, Notes [5] and [6].

<sup>\*</sup> There were no LGAs with 20 murder victims, hence no trend tests were reported. The trend test for NSW on the offence of murder is for the number of victims, not incidents.

TABLE 2.3B: RATIO TO NSW RATE<sup>^</sup> OF RECORDED CRIMINAL INCIDENTS PER 100,000 POPULATION FOR MAJOR OFFENCES OVER THE 12 MONTHS TO MARCH 2017, NSW LGAS

<sup>^</sup> For further explanation of rate calculation populations and the ratio to NSW rate, see page 25, Note [7] and footnote 3. A result of '.' indicates either that there were no relevant offences recorded in the LGA, or that the population is less than 3,000 people and no rate was calculated.

Sydney LGA can be considered a special case since the population used to calculate the rate is much lower than the population using the area for work and entertainment and this

will be reflected in higher incident rates.

\* Murder counts and rates at the LGA level are available from the BOCSAR Crime Mapping Tool (http://crimetool.bocsar.nsw.gov.au/bocsar/) and in various datasets on the BOCSAR website (http://www.bocsar.nsw.gov.au/)

TABLE 2.3C: NUMBER OF RECORDED CRIMINAL INCIDENTS FOR MAJOR OFFENCES, OVER THE 12 MONTHS TO MARCH 2017, NSW LGAS

### **SECTION 3:**

### METHODS OF PROCEEDINGS AGAINST ALLEGED OFFENDERS

TABLE 3: NUMBER OF ALLEGED OFFENDERS RECORDED BY NSW POLICE FORCE

BY METHOD OF LEGAL PROCEEDINGS OVER THE 24 MONTHS TO MARCH 2017, NSW

	Number of alle	eged offenders		ver the last nonths
Type of process	over the 12 months to March 2016	over the 12 months to March 2017	Change	Annual percentage change
Proceeded against to court:				
Bail Court Attendance Notice	60,360	61,049	689	1.1%
No-Bail Court Attendance Notice (a)	4,235	4,846	611	14.4%
Future Court Attendance Notice	44,893	41,178	-3,715	-8.3%
Field Court Attendance Notice	49,046	47,670	-1,376	Stable
All proceedings to court	158,534	154,743	-3,791	Stable
Proceeded against other than to court:				
Youth Justice Conference (b)	621	554	-67	Stable
Caution Young Offenders (b)	7,126	6,570	-556	-7.8%
Cannabis/other drug caution	6,289	5,224	-1,065	-16.9%
Criminal Infringement Notice	9,797	9,221	-576	Stable
Infringement Notice	653,537	695,600	42,063	6.4%
Liquor Offence Compliance Notice (c)	479	376	-103	-21.5%
YOA warnings from 2010	10,077	9,904	-173	Stable
All proceedings other than to court	687,926	727,449	39,523	5.7%
All proceedings	846,460	882,192	35,732	4.2%

<sup>^</sup> For further explanation of **trend results**, see page 25, Notes [5] and [6].

<sup>(</sup>a) Following changes to the Bail Act in May 2014, No-Bail CANs are used almost solely for incidents of 'Breach of bail conditions' and no bail determination is required because the original determination stands until a new determination is made.

<sup>(</sup>b) Previous reports have included juvenile offenders initially proceeded against to court by Police and then referred to Youth Justice Conference or given a caution by the court under the Young Offenders Act. They are now counted as being proceeded against to court by Court Attendance Notice as that was the method of proceeding used by the Police. Consequently data in this report is not comparable with data in previously published reports. Comparable data for previous years is available on request.

<sup>(</sup>c) Since mid-2008, Police have issued compliance notices for breaches of liquor licensing regulations/legislation. Commonly these are for relatively minor breaches eg fail to display regulated signs. Liquor Offence Compliance Notices have been added to the recorded crime collection from the 2015 report. Consequently data in this report is not comparable with data in previously published reports. Comparable data for all years available on request.

### APPENDIX 1: TRENDS IN RECORDED CRIMINAL INCIDENTS FOR NSW

- [1] Irrespective of how trends in recorded crime are presented, their interpretation is a difficult task. The recorded criminal incident data presented in this report are based on information derived from the NSW Police Force Computerised Operational Policing System (COPS), so only those incidents which are reported to, or detected by, police are included. The trends in recorded crime shown in this report will, therefore, reflect movements in the underlying factors which influence the detection, reporting and recording of crime, as well as changes in the true level of crime in the community.
- [2] An alternative measure of the level of crime in Australia is available from crime victim surveys, for example the national Crime Victimisation Survey (now in its seventh year) by the Australian Bureau of Statistics (ABS)<sup>1</sup>. As well as providing an estimate of the victimisation rate at the State level for a selected set of offences, this survey estimates the proportion of crimes which are not reported to police, and are therefore not recorded in the official statistics. In particular, personal crimes, such as assault and robbery, are less likely to be reported than crimes which involve households. Given that some offences have low reporting rates, it is possible that changes in recorded crime rates over time for these offences may be reflecting changes in reporting rates. This ABS publication contains seven financial years of personal and household summary crime data obtained from a national survey, much of which is disaggregated to state level (see Tables 4 and 5 for NSW)<sup>2</sup>. For NSW, the latest report states that physical assault for those aged 15 and over was reported to police 56.0 percent of the time, with a personal victimisation rate of 1.6 percent. For households, NSW breakins were reported to police 79.6 percent of the time, with a household victimisation rate of 2.0 percent. For NSW the above estimates for 2014-15 victimisation and report rates were not found to be significantly different to the corresponding rates published in the financial years 2008-9 to 2013-14.
- [3] Public willingness to report crime, however, is just one of the extraneous factors which can affect trends in recorded crime. Shifts in policing policy can also have a marked effect on the number of recorded drug offences, cases of offensive behaviour or of receiving stolen goods. For these offences, therefore, recorded rates probably do not accurately reflect actual rates. For this reason, the more detailed comparisons of crime rates and examination of trends in this document are restricted to offence categories which are more likely to be reported to, rather than detected by police.
- [4] The interpretation of trends in official reports of crime can be considerably more difficult than the interpretation of trends in unemployment or inflation statistics. The ease with which recorded crime statistics can be misunderstood creates a temptation to offer an authoritative explanation for each major crime trend. Indeed, in many instances it is simply impossible to state with any assurance why a particular trend has appeared. This report, therefore, confines itself to identifying and describing trends in recorded crime, rather than explaining them.
- [5] For each offence category or subcategory (except murder), a statistical test for trend was applied to the monthly numbers of recorded criminal incidents over the relevant period. In the case of murder, the statistical test for trend was applied to the monthly numbers of victims over the period. The trend test used was Kendall's rank-order correlation test (see, for example, Conover, W.J. 1980, Practical Non-Parametric Statistics, 2nd ed, John Wiley and Sons, pp 256-260). A two-tailed test was used to determine whether there had been an increasing or decreasing trend in the recorded numbers of criminal incidents over the relevant period covered in the report. Some month to month variations in the numbers of recorded incidents could be due in part to seasonal factors. The test for trend is not sensitive to seasonal variations; it is sensitive only to a generally increasing or generally decreasing trend over the time period examined.
- [6] For the trend tests throughout this publication, where a statistically significant trend was found (p < .05), the extent of the trend is indicated by the percentage change in the total number of recorded criminal incidents between the latest two consecutive 12-month periods for 24 month tests; and the average annual percentage change between the first 12-month period and the latest 12-month period for longer tests. A trend test was not performed if there were fewer than 20 incidents in any of the years for the period in question. The result ' . ' indicates that a trend test was not performed. A non-significant test result (p > .05) is denoted by 'Stable' or by 'ns' in some larger LGA tables.
- [7] The ratio to NSW rate statistics are a comparison of a NSW regional rate per 100,000 population to the NSW rate per 100,000 population. A ratio of one indicates parity with the NSW rate. Ratios indicating double the NSW rate (or more) before rounding are highlighted in red, whilst ratios indicating half the NSW rate (or less) before rounding are highlighted in yellow.
- 1. Australian Bureau of Statistics 2014, 45300D0001\_2012201306 Crime Victimisation, Australia, 2014-15, Cat. No. 4530.0, ABS, Sydney.
- 2. Australian Bureau of Statistics 2014, 45300D0001\_2012201306 Crime Victimisation, Australia, 2014-15, Tables 4 and 5, Cat. No. 4530.0, ABS, Sydney.
- 3. For the rate calculations throughout this publication, population data were obtained from the Australian Bureau of Statistics publication: Regional Population Growth Australia 2013-14 Cat. No. 3218 (for 2013 and 2014 population estimates). As no population estimates were available for the years 2015 and 2016 when this report was published, rates for the years 2015 and 2016 were calculated using 2014 population estimates.

### **APPENDIX 2: DEFINITIONS AND EXPLANATORY NOTES**

The data in this report are extracted from the NSW Police Force's Computerised Operational Policing System (COPS). This system is used for record-keeping for all police operations, not just for criminal matters.

In this report:

- the counting units are recorded *criminal incidents* rather than recorded *offences* (except for murder and manslaughter, where the counting units are victims); and
- the data are categorised by date of *reporting* to police (or date of detection by police) rather than by date of *occurrence* of the offence.

### **RECORDED CRIMINAL INCIDENTS**

A criminal incident is defined as an activity detected by or reported to police which:

- involved the same offender(s);
- involved the same victim(s);
- occurred at the one location:
- . occurred during one uninterrupted period of time;
- falls into one offence category;
- falls into one incident type (for example, 'actual', 'attempted', 'conspiracy').

One incident may involve two offenders assaulting the same victim. This would be recorded as one assault incident. Alternatively, suppose a man reports to police that he found his neighbour in the process of damaging his car and, when confronted, the neighbour assaulted him. For such an event, two criminal incidents are recorded because two distinct offence types are involved (malicious damage to property and assault) even though the same parties were involved at the same time and in the same place.

### **RECORDED VICTIMS**

For murder and manslaughter only, the counting units used are victims. Under the definition of a criminal incident (same parties, same time, same place, same offence and same incident type) one murder or manslaughter incident could involve two or more persons being killed. Because of the seriousness of these offences and their relatively small numbers, it is considered to be more appropriate to count the number of victims, rather than the number of criminal incidents. Hence, where one murder incident involves a person killing six people, six murder victims are counted.

### **OFFENCE CATEGORIES**

The classification of offences in this report is broadly based on the Australian and New Zealand Standard Offence Classification (ANZSOC) devised by the Australian Bureau of Statistics (ABS 2011, third edition, Cat. No. 1234.0).

For all types of offence classifications used in the report, Appendix 3 lists the offence categories included in the classification. The original offence incident categories are those used by the NSW Police Force and do not necessarily correspond exactly with offences as defined in legislation.

### **MAJOR OFFENCE CATEGORIES**

Major offence categories include the most serious personal violence and property offences. The most serious of these offences is *murder* for which the incident count is the number of victims. Assault offences include the two major offence categories of *domestic violence related assault* and *non-domestic violence related assault*. All sexual offences are categorised by the two major offence types, either as *sexual assault* or *indecent assault*, *act of indecency and other sexual offences*.

Robbery offences are sorted into three categories by use of weapon: robbery with a firearm, robbery with a weapon not a firearm or robbery without a weapon. The serious theft offences in this group start with the burglary categories of break and enter - dwelling and break and enter - non-dwelling followed by motor vehicle theft and steal from motor vehicle. Other theft offences included in the 17 major offences are steal from retail store, steal from dwelling, steal from person and fraud. The final property offence listed as a major offence is malicious damage to property.

### APPENDIX 2: DEFINITIONS AND EXPLANATORY NOTES continued

### **COUNTING PERIOD**

Criminal incidents are included in the counting period in which they were reported to or detected by police.

In most cases criminal incidents are recorded on COPS on the day of reporting. However there may be some time delay before the incident gains the status of accepted and verified (which are necessary conditions for inclusion in this report). It is therefore possible for some updating of data to occur. That is, data extracted for a specified period of time may differ according to the date of extraction of the data.

In recent years some historic murders have been re-entered on the COPS system after being referred to the unsolved homicide squad. Murders that were first reported to NSW Police prior to the introduction of the COPS system in 1995 but recorded on the COPS system in recent years are excluded from the statistics. Murders which took place prior to 1995 but were first reported to Police in or after 1995 are included in the statistics.

### PROCEEDINGS AGAINST ALLEGED OFFENDERS

Police may proceed against alleged offenders through a variety of legal or other processes. Most alleged offenders are referred to the NSW Criminal Courts. The more serious offences are dealt with by way of a Bail Court Attendance Notice (CAN) or a No-Bail CAN. In these instances, the alleged offender is arrested, taken to a police station, fingerprinted and the details of the person and all charges are recorded. A Bail CAN is used when a bail determination is required and a No-Bail CAN when a bail determination is not

Following changes to the Bail Act in May 2014, No-Bail CANs are used almost solely for incidents of 'Breach of bail conditions' and no bail determination is required because the original determination stands until a new determination is made by the court. Alternatively a Field CAN may be issued by police at other locations. A Future CAN is used for less serious offences. Due to the time lag between the incident being recorded and the Future CAN being issued, data for the last three months are likely to be low and subject to

Some alleged offenders are proceeded against but diverted from the criminal court system. For many minor offences police can issue Infringement Notices. By paying the prescribed penalty the offender avoids having to go to court. Under the *Young Offenders Act 1997*, a juvenile offender can be issued with either a warning, a caution or referred to a youth justice conference.

Youth Justice Conference and cautions data in previous reports have included juvenile offenders initially proceeded against to court by Police and then referred to a conference or given a caution under the Young Offenders Act by the court. From the 2015 report, they are now counted as being proceeded against to court by Court Attendance Notice as that was the method of proceeding used by the Police. Consequently data in this report is not comparable with data in previously published reports. Comparable data for previous years is available on request.

Data on warnings under the *Young offenders Act*, is available from January 2010 onwards. Due to changes in how warnings are recorded, this data series can not be compared with warning data previously published. A youth justice conference is a face-to-face meeting between offenders, victims and their support persons. The offending behaviour is discussed and an outcome plan for the offender negotiated. Note that both the police and the courts can refer a young person to a youth justice conference. However, the number of alleged offenders proceeded against by way of a youth justice conference, as shown in Table 4.1, includes only police referrals to a youth justice conference.

Since mid-2008, Police have issued compliance notices for breaches of liquor licensing regulations/legislation. Commonly these are for relatively minor breaches eg fail to display regulated signs. Liquor Offence Compliance Notices have been added to the recorded crime collection from the 2015 report. Consequently data in this report is not comparable with data in previously published reports. Comparable data for all years available on request.

Each offender or alleged offender appears only once in the table for each event. Note that multiple criminal incidents may be associated with a single event. The processes are arranged in a hierarchy with the offender or alleged offender appearing in the most serious category where multiple incidents are involved. For example if an event involves two incidents and the alleged offender is charged for one incident but receives a caution for the second incident, the alleged offender appears only in the relevant 'proceeded against to court' category.

### APPENDIX 2: DEFINITIONS AND EXPLANATORY NOTES continued

### PROCEEDINGS AGAINST ALLEGED OFFENDERS continued

Note that in these tables, the year refers to the year in which the criminal incident or incidents were **reported** to police. For example, if an incident was reported to police in 2015 but the alleged offender was not apprehended and charged until 2016, the offence is counted for 2015. This section also includes a figure showing trends over 24 months in methods of proceeding against offenders and alleged offenders which lead to attendance at court. Alleged offenders who are not legally proceeded against are not included in this report

### **REGIONAL STATISTICS**

Statistics are provided on the number of criminal incidents (victims for murder) recorded for each of the Statistical Areas (SAs) of NSW as defined by the Australian Bureau of Statistics (ABS).

Recorded criminal incidents which occurred in correctional, detention or remand centres, however, are not counted in the SA in which the incident occurred. Appendix 4 provides maps indicating the location of each SA. Appendix 5 lists the Local Government Areas (LGAs using 2008 boundaries) within each of the SAs. Note that LGA boundaries change from time to time. A criminal incident is counted within a particular region when the location of the offence falls within that region.

For the rate calculations, population data were obtained from the Australian Bureau of Statistics publication: *Regional Population Growth, Australia, 2014-15*, Cat. No. 3218.0. As no population estimates were available for 2016 when this report was published, rates for 2016 were calculated using 2015 population estimates.

BOCSAR offence	NSW Police Force incident categories		
Homicide			
Murder	Murder		
Attempted murder	Murder – attempted Shoot with intent to murder		
Murder accessory, conspiracy	Murder – conspiracy Murder – solicit		
Manslaughter – not driving	Manslaughter		
Assault	Includes any of the following offences disaggregated by whether or not police have flagged the incident as domestic violence related:		
Domestic violence related	Actual bodily harm Assault common Grievous bodily harm (including malicious wounding) Shoot with intent other than to murder Spike drink/food		
Non-domestic violence related	Actual bodily harm Assault common Grievous bodily harm (including malicious wounding) Shoot with intent other than to murder Spike drink/food		
Assault Police	Assault Police officer		
Sexual offences			
Sexual assault	Sexual assault – adult victim (16+ years old) Sexual assault – child victim, reported when adult Sexual assault – child victim, reported when child
