## Formal Access Application - Notice of Decision

I refer to your Formal Access Application under the Government Information (Public Access) Act 2009 (GIPA Act) lodged with the Department of Communities and Justice (the Department) on 22 September 2023 where you requested access to:
'[A]ny reports, reviews or studies, either external or internal, relating to the efficacy or effectiveness of Apprehended Domestic Violence Orders since 2018. I would like to include the study examining the effectiveness of longer ADVOs in reducing domestic violence, and 'An evaluation of the What's your Plan intervention and its impact on rates of Apprehended Domestic Violence Order breaches and domestic violence offending by Aboriginal defendants.'

As per your email dated 25 October 2023, you agreed to exclude a university student's assessment paper from the scope of your request.

## Decision

For the reasons set out in this notice, I have decided to:

- Grant you full access to documents 1-11 and deferred access to document 14 in accordance with $\mathrm{s} 58(1)$ (a) of the GIPA Act.
- Refuse you access to documents 12-13 in accordance with s 58(1)(a) of the GIPA Act because there is an overriding public interest against disclosure of the information.

## Searches

On 12 and 19 October 2023 the Department conducted a search for records falling within the scope of your request. I am satisfied that a thorough search was conducted noting that searches were conducted of the Department's electronic file management system (TRIM), BOCSAR's databases and local computer drives and 14 documents were identified.

## Reasons for decision

Document 12 - Sch 1, cl 2(1)(e) - Cabinet information
Document 12 is cabinet information relating to the monitoring of reforms. Under schedule 1, cl 2(1)(e) of the GIPA Act there is a conclusive presumption against the disclosure of cabinet information. I have decided that there is a conclusive presumption against the disclosure of this document, noting that:

- It is a document prepared after Cabinet's decision that would reveal or tend to reveal information that concerning that decision (C2018-0325).
- It reveals the position that the Attorney-General has been recommended to take on a matter in Cabinet.
- It is marked NSW Cabinet.
- It would not be in existence if it weren't for Cabinet's decision in C2018-0325.

Department of Communities and Justice
Postal address: Locked Bag 5000, Parramatta NSW 2124
W www.dcj.nsw.gov.au
T (02) 97162662

The document falls squarely within sch $1, \mathrm{cl} 2(1)(\mathrm{e})$ and access is refused.
Document 13 - Section 14, table (1)(f) - Prejudice the effective exercise of the agency's functions
Clause 1(f) of the table at section 14 states:
There is a public interest consideration against disclosure if disclosure of the information could reasonably be expected to prejudice the effective exercise by an agency of the agency's functions
To show that this is a relevant consideration against disclosure, the agency must establish:

- the relevant function of the agency;
- that is or would be prejudiced by release of the information.

The meaning of the word prejudice is to "cause detriment or disadvantage'.

## The Department's functions

The Department is the lead agency in the Communities and Justice portfolio, which aims to create safe, just, inclusive and resilient communities through its services. The Department works with children, adults, families and communities to deliver services with a unified and collaborative approach with the objective of achieving a vibrant, sustainable and inclusive community. Within the Department sits Strategy, Policy and Commissioning (SPC), which is a division that provides policy and strategic support, and data analytic services, to the entire Department. The services provided are broad, and include leading the development and implementation of policies and strategies relating to child protection and out-of-home care and domestic and family violence. SPC's functions are primarily exercised in support of the functions of other divisions of the Department. As such, SPC's functions affect members of the public by informing and supporting service delivery, strategy, and policy across other areas of the Department.

Relevantly, one of SPC's functions extend to considering legal policy and legislative reform relating to domestic and family violence in New South Wales, particularly the operation of the Crimes (Domestic and Personal Violence) Act 2007 (CDPVA). The Department engages in medium to long-term projects that review aspects of the CDPVA, including public consultation (where approved by the Attorney), and then makes recommendations for legislative change to the Attorney. These objectives are important because they enable the Department to assist policy makers and administrators in the criminal justice system to develop and implement strategies which reduce crime, including domestic violence and to provide a more efficient, effective and equitable justice system.

## Release would prejudice the effective exercise of the Department's functions

Document 13 is a document relating to Apprehended Domestic Violence Orders (ADVOs). The document reveals potential system wide opportunities relating to order 6 obtained from research and field work and is currently the subject of discussion, review and ongoing research by the Department. In my view, there is a real risk that releasing this information would alert offenders to potential gaps, inconsistencies, or concerns with order 6 and allow offenders to circumvent these orders. This would in turn affect the Department's ability to support women and community safety policy development and reform. If any confidential feedback from stakeholders is released as part of this GIPA application, it is reasonable to expect that individuals who voluntarily provide information to the Department in relation to the welfare of women children and families would be reluctant to do so in the future. The information provided is often sensitive information, which if released could reasonably be expected to have a detrimental impact upon the relationship an individual has in their community, place the community at further risk, and jeopardise an individual's welfare. Individuals would be more hesitant to provide information in if they knew that this information would be disclosed publicly to the world at large. In the absence of this voluntary information the Department would be unable to fully carry out its functions.

The ongoing policy and legislative reform work in the Order 6 space is an important part of the Department's functions. Ensuring that information uncovered as part of ongoing work is not
disclosed to the public and offenders in this case is essential in ensuring that the Department can perform its functions.

## Public interest balancing test

In deciding which information to withhold in full or in part, I was required to conduct a "public interest test" where the public interest considerations favouring disclosure of government information were weighed against those factors that do not favour disclosure. The following are a number of public interest factors I considered which favour disclosure of the information requested:

- Disclosure of the information could reasonably be expected to promote open discussion of public affairs, enhance Government accountability or contribute to positive and informed debate on issues of public importance.
- Disclosure of the information could reasonably be expected to inform the public about the operations of agencies and their policies and practices for dealing with members of the public.

However, in conducting the balancing test required to be conducted under section 14 of the GIPA Act, I place significant weight on the public interest consideration against disclosure for the reasons outlined above (1(f)), and less weight on the considerations in favour of disclosure. I have balanced the public interest considerations for and against disclosure. In my view, there is an overriding public interest against disclosure and I have refused access to this document.

## Document 14 - Deferred access

Document 14 is a draft report, titled 'The impact of Apprehended Domestic Violence Order duration on offending and breaches'. This draft research report reflects the work to date for a research project investigating the impact of a 2018 DV policy change which saw the standard duration of ADVOs in NSW rise from 12 months to 24 months. Document 14 is the most recent draft of the report - but not the final version. This draft has been distributed to three independent, external experts for their review (as is BOCSAR's normal practice). Once the report has been finalised, it will be submitted to the Department's executives and ministerial offices before being released to the public. In accordance with section 78(1)(c) of the GIPA Act, I have decided to defer access to 2024.

## Review rights

If you are aggrieved by any of the reviewable decisions in this notice of decision, you may seek a review under Part 5 of the GIPA Act, by requesting any one of the following:

- An internal review that must be lodged with Open Government, Information and Privacy within 20 working days of this notice of decision. You must lodge your internal review at the address shown at the bottom of the first page and must be accompanied by the appropriate application fee of $\$ 40$.
- Alternatively, a request for an external review may be lodged with either the Information and Privacy Commission, or the NSW Civil and Administrative Tribunal. Please note that you must lodge your request for an external review within 8 weeks of this notice of decision.

If you have any questions or concerns in relation to this matter, please contact the Department on telephone (02) 97162662.

Yours sincerely

## Appendix A: Relevant provisions under the GIPA Act

## 14 Public interest considerations against disclosure

## Table

## 1 Responsible and effective government

There is a public interest consideration against disclosure of information if disclosure of the information could reasonably be expected to have one or more of the following effects (whether in a particular case or generally)-
(f) prejudice the effective exercise by an agency of the agency's functions,

## 78 Deferral of access

(1) An agency that has decided to provide access to government information in response to an access application may defer providing that access if-
(c) the information is contained in a record (or a draft of or extract from a record) that has been prepared for submission to a particular person or body, or that has been designated by the responsible Minister for the agency as appropriate for submission to a particular person or body, but is yet to be submitted.

## Schedule 1

## 2 Cabinet information

(1) It is to be conclusively presumed that there is an overriding public interest against disclosure of information (referred to in this Act as Cabinet information) contained in any of the following documents-
(d) a document prepared after Cabinet's deliberation or decision on a matter that would reveal or tend to reveal information concerning any of those deliberations or decisions,
(e) a document prepared before or after Cabinet's deliberation or decision on a matter that reveals or tends to reveal the position that a particular Minister has taken, is taking, will take, is considering taking, or has been recommended to take, on the matter in Cabinet,

## Bureau Brief

# 'What's Your Plan?' process evaluation 

Paul Nelson

#### Abstract

Aim: 'What's Your Plan?' (WYP) is a brief program designed to increase compliance with Apprehended Domestic Violence Orders among Aboriginal defendants, delivered by Aboriginal Client and Community Support Officers (ACCSOs) in the Local Court. This process evaluation aimed to: (1) determine whether WYP was implemented as intended in the first seven months of operation, and (2) identify barriers and facilitators to implementation.

Method:The evaluation reviewed implementation in 45 courts from October 2017 to April2018 (thefirst seven months of the planned two-year trial period required for BOCSAR's outcome evaluation). Data on trial activity in treatment weeks (during which ACCSOs offered WYP) and comparison weeks (during which ACCSOs did not offer WYP) were extracted from the WYP database and augmented with interviews (with delivery staff, supervisors, and stakeholders), court observations and trial documentation.

Results: During the seven month review period, ACCSOs identified 1,031 eligible defendants (about a third of the estimated eligible population). The treatment group comprised the 374 eligible defendants who attended court in treatment weeks and could therefore be offered WYP. Of these 374,283 (76\%) were offered WYP and 104 (28\%) completed the WYP session. Most completers also received SMS reminders or a follow-up call. Identification of Aboriginal persons proved difficult, as ACCSOs did not have access to a reliable list of Aboriginal defendants. The key facilitator of intended implementation was the enthusiasm of ACCSOs and management to participate in the trial and deliver WYP. Despite this, non- or incomplete engagement (defendants who were identified but did not receive or respond to an offer to participate) was a major source of attrition. A consistent barrier to implementation was the narrow window of time in which ACCSOs had to locate and deliver WYP with voluntary participants, whilst managing competing demands from other clients, especially on busy court days. Most ACCSOs also experienced long delays between training and completing WYP sessions, which meant they had little opportunity to reinforce and refine planning skills with defendants. Discussion: WYP is an innovative program for Aboriginal defendants that has been widely implemented in courts across NSW. Despite some structural barriers to implementation, the diverse workforce and settings for this trial, and its substantial delivery and reporting demands, WYP has been, for the most part, implemented as intended.

Keywords: domestic violence, ADVO, treatment, Aboriginal, implementation, process evaluation

## Introduction

Domestic violence (DV) is a focus of NSW criminal justice policy under the Premier's Priority to Reduce DV Reoffending (Freeman, 2018). Apprehended Domestic Violence Orders (ADVOs) are one important tool in efforts to reduce DV. ADVOs are made to protect persons with whom the defendants are, or have been, in a domestic relationship, such as partners, relatives and members of the same household.' In NSW, ADVOs are civil orders that are enforced in the criminal jurisdiction if the order is breached. In NSW, the proportion of Aboriginal defendants that breach their ADVO within 12 months of issue is considerably higher than that of non-Aboriginal defendants ( $24.6 \%$ versus $16.8 \%$; Poynton,

Stavrou, Marrott, \& Fitzgerald, 2016), so reducing breach rates by Aboriginal defendants is a priority. This report describes a process evaluation of 'What's Your Plan?' (WYP), a behavioural initiative designed to reduce ADVO breach rates among Aboriginal defendants.

## WYP background

In 2016 and 2017, Aboriginal Services Unit (ASU) and the Department of Premier and Cabinet's Behavioural Insights Unit (BIU) co-developed 'What's Your Plan?' (WYP): a brief individualised behaviour change program for Aboriginal ADVO defendants to help them comply with their ADVO. WYP was designed to be delivered at court by Aboriginal Client
and Community Support Officers (ACCSOs) and consists of a structured tool to guide ADVO discussions and optional followup. WYP seeks to support compliance through the application of evidence-based psychological strategies and well-timed reinforcement. Briefly, WYP first requires that ACCSOs discuss the conditions and implications of a defendant's ADVO. Defendants are then asked to conceive a positive future arising from complying with their ADVO, to identify an obstacle that may jeopardise compliance, and to create a plan to help manage this obstacle. Ideally, defendants also design a timely text message (SMS) reminder of their motivation to comply.

WYP underwent an extensive development and co-design process with ASU to clarify its operational requirements with the object of creating a program that would be considered culturally appropriate by ACCSOs, defendants and their communities. Codesign began with group consultation between ASU, Courts and Tribunal Services and other members of the WYP governance group (including NSW Police, Aboriginal Legal Services, and Legal Aid) and invited representatives from DV program providers. Workshops were held with ACCSOs to refine the format and wording of the tool and planning sessions. The Bureau of Crime Statistics and Research (BOCSAR) was engaged to conduct a process and outcome evaluation of WYP.

WYP was piloted in several NSW Local Courts from March to May 2017, and was rolled out to other courts from June to September 2017. During this time, Quality Assurance (QA) procedures and an online program database were developed. Dedicated QA roles were also established. A QA Coordinator was appointed to train, observe, and coach ACCSOs in their implementation of WYP (including delivery of WYP sessions, data recording, and adherence to trial procedures). One'WYP ACCSO' was appointed in each ASU region to deliver WYP, support other ACCSOs to implement WYP, and collate their region's data. Staff completed a one day training session prior to delivering WYP. The WYP trial period commenced in October 2017 and is intended to run for two years. ${ }^{2}$ The inclusion criteria were all non-incarcerated adult defendants identified as Aboriginal and issued an interim or final ADVO at a WYP court during the trial period. Participation was voluntary.

To ensure a valid counterfactual is available for BOCSAR's outcome evaluation, a quasi-experimental design was adopted for the trial whereby defendants become eligible for WYP (the treatment) and the comparison condition on an alternating (typically weekly) cycle synchronised with local court sitting arrangements. Defendants who are issued an ADVO in a given week and attend court can be offered WYP and enter the treatment group. Defendants who are issued an ADVO in the following week and attend court cannot be offered WYP; these defendants enter the comparison group. Defendants remain eligible for other services provided by ACCSOs irrespective of their participation in the trial. This design was chosen to maximise the similarity between treatment and comparison groups. ${ }^{3}$

WYP was designed as a 'process enhancement' for ACCSOs' existing frontline support work, providing a specific structure for their interaction with DV defendants. Thus, some detai
about their existing work is offered. ACCSOs are employed by ASU to provide frontline support in many NSW Local Courts to Aboriginal court users (defendants, victims, families, and others). ACCSOs may also outreach to Aboriginal people in the community and coordinate Community Justice Groups. Court support may involve explaining court processes and outcomes, assistance with forms, liaison with legal representatives, service referrals, and communication between detainees and their families. ACCSOs offer specific programs to court users who meet certain eligibility criteria, including the voluntary Driving and Licence Offences Project for traffic offenders. Prior to WYP being trialled, ACCSOs also typically supported ADVO defendants by discussing conditions and implications of breaching their order.

The intended WYP process is shown in Figure 1. The process involved several steps, some of which could overlap, be skipped,

Figure 1. WYP process

or be repeated. For example, ACCSOs sought to identify defendants on court lists before their court date, but in practice, some defendants were not identified until they were engaged (spoken with by ACCSOs) at court. Figure 1 does not detail the provision of non-WYP services.

## Treatment effectiveness

Reviews of treatment programs for DV offenders offer inconsistent evidence of their effectiveness in reducing DV reoffending, with weaker effects evident from more robust designs (e.g. Feder, Wilson, \& Austin, 2008). There is no evidence for Duluth-based treatments but some promise for others including behaviourally-based programs (Miller, Drake, \& Miller, 2013). No large-scale studies of DV treatment effectiveness with Aboriginal DV offenders were located for this review. However, Gallant et al. (2017: 64) note the"rich development of practice frameworks which weave cultural practices, attention to social justice, and the components of behaviour change into prevention of family violence" and "remarkable consistencies across [such] programs in Australia, New Zealand and Canada in providing these elements in a holistic approach to Aboriginal men and their families and communities". A recent meta-analysis of treatment programs for Indigenous offenders has also indicated that culturally relevant programs were significantly more effective than generic programs in reducing recidivism (Gutierrez, Chadwick, \& Wanamaker, 2018), although the included programs did not specifically target DV or Australian Aboriginal offenders.

The core elements of WYP are its use of the self-regulatory behaviour change strategies of mental contrasting (MC) and implementation intentions (II). MC fosters goal attainment through more effective goal setting, by having individuals compare a desired future with their current reality (Oettingen \& Gollwitzer, 2010). As applied to ADVO compliance, MC involves defendants imagining a positive future arising from the benefit of complying (versus not complying) with their order. II fosters goal implementation by having individuals create an 'if-then' plan in which a specific cue (the'if' component) triggers a desired behaviour (the'then' component) (Oettingen \& Gollwitzer, 2010). In WYP, II requires defendants to identify an obstacle that could prevent them from complying with their ADVO (and thus prevent them from achieving their goal), and to develop a suitable plan to manage this obstacle.

A strong theoretical and experimental evidence base supports the effectiveness of MC and II in increasing goal attainment across a wide range of problem domains (Oettingen \& Gollwitzer, 2010; Toli, Webb, \& Hardy, 2016). Il has stronger effects on goal attainment in samples with mental health or substance abuse problems (Gollwitzer \& Sheeran, 2006) and is more effective when goals are fewer in number and clearly defined and operationalised (Oettingen, 2012).

There is also evidence for the effectiveness of SMS reminders (which are used to supplement MC and II in WYP) in supporting goal attainment (e.g. Prestwich, Perugini, \& Hurling, 2010; Vervloet et al., 2011) and court attendance (BIU, 2018). However, there have been few applications of MC and II in criminal justice,

DV, or with Aboriginal people and no known studies involving Aboriginal DV defendants. Treatment fidelity and the delivery environment can strongly affect treatment outcomes and have been shown to do so in many evaluations of court-based programs (Cissner \& Farole, 2009). Thus it is important to assess not only the outcomes of WYP but the way in which WYP is implemented and factors affecting implementation.

## Aim

This report presents the results of a process evaluation of the first seven months of the WYP trial period. The aims of this process evaluation were to:

1. Assess whether WYP was implemented as intended, and
2. Identify barriers and facilitators to the intended implementation of WYP.

To address these aims the evaluation explored whether certain conditions necessary for implementation were met during the trial. These conditions, outlined below, were identified through examination of key project documentation (including training material, the original WYP process enhancement proposal, and WYP Guide for ACCSOs) and consultation with design and delivery partners. They relate to identification and engagement of eligible defendants, delivery of WYP sessions and follow-up, and data collation and quality assurance procedures.

1. Identification and engagement:
a) ACCSOs consistently identify eligible defendants on court lists;
b) ACCSOs engage and offer WYP to as many eligible defendants as possible;
c) Steps are taken to ensure balance in the treatment and comparison groups. ${ }^{4}$
2. Delivery of WYP session and follow-up:
a) ACCSOs explain ADVO conditions and discuss their practical implications for daily life;
b) Defendants identify a reason (ideally a positive goal) to comply and a specific obstacle;
c) Defendants create (ideally write) a suitable 'if-then' plan to manage the obstacle and retain this on a card;
d) Defendants and ACCSOs co-design a suitable SMS reminder and schedule for high-risk times;
e) SMS reminders and follow-up phone calls are made, and plans are revised as requested.
3. Data collation and quality assurance procedures are followed during the review period.

## Method

This process evaluation measured whether the above conditions were met through a review of trial data, qualitative interviews with delivery staff and stakeholders, file reviews and ongoing participation in WYP quality assurance team meetings. BOCSAR's court data were also used to estimate the volume of eligible defendants. Frequently used acronyms and terminology are presented in the Appendix.

## Sample

The review period (1 October 2017 to 28 April 2018) comprised the first seven months of the trial period. The review included 45 courts, excluding courts that joined the trial in March or April 2018 (i.e. Blacktown, Penrith, and Parramatta). ${ }^{5}$ From October 2017, Aboriginal defendants who were issued an interim or final ADVO at a WYP court and were not in custody at the time their matter was finalised were included in the trial. These criteria were adjusted on 19 February 2018 to include defendants with provisional ADVOs. ${ }^{6}$ Defendants can be eligible for the trial only once (i.e. if they are issued a subsequent ADVO they do not reenter the trial).?

## WYP data

WYP data were originally recorded in individual spreadsheets and collated on request by ASU. Recording transitioned to a purpose-built web-accessible database in mid-October 2017, with all ACCSOs receiving training in its use. Records of trial activity before this time were added to the WYP database during the review period. ACCSOs were to enter details of all defendants deemed eligible for the trial, in treatment or comparison weeks. Personal identifiers, outcomes of offers to participate in WYP, delivery of WYP and agreed follow-up arrangements (including SMS reminder details) were also to be entered for those defendants who agreed to participate. WYP data for this study were extracted and provided to BOCSAR by ASU in May 2018 and subjected to extensive data cleaning, with edits and additions made to the data during June and July 2018. Analysis was predominantly descriptive. Additional information on plan quality and SMS message delivery were supplied by BIU.

To assess the extent to which eligible Aboriginal defendants were being identified by ACCSOs during the trial period, the WYP data were compared with data from the NSW Police Computerised Operational Policing System (COPS). These data included the number of Police-identified Aboriginal Persons of Interest (POIs) issued a final ADVO between October 2017 and April 2018. An individual was counted as Aboriginal if they had ever self-identified as Aboriginal to the police. ${ }^{8}$ In this dataset, an individual was counted more than once if they were issued multiple final ADVOs during the trial period (e.g. if there were multiple protected persons). This means that the actual volume of eligible Aboriginal defendants would be lower than what is estimated here. However, very few Aboriginal final ADVO recipients are likely to receive multiple final ADVOs within a seven month period, so any difference would be small. ${ }^{9}$

## Qualitative interviews

Interviews were conducted in two phases: from mid-October to mid-November 2017 and in April 2018. A total of 50 interviews were conducted, half of which were with ACCSOs or their Regional Coordinators (RCs). All RCs, WYP ACCSOs (ACCSOs employed to deliver WYP and support other ACCSOs to deliver WYP), and ACCSOs/Senior ACCSOs from at least three courts in all four ASU regions were interviewed. Interviews were also held with the WYP QA Coordinator; ASU's Director and Program, Research, and Operations Managers; BIU staff; and members of the magistracy and Justice executives. Ten people participated in both interview phases.

Interviews were semi-structured and were used to help understand implementation processes and barriers and facilitators to implementation (see the Appendix for a sample interview schedule). Questions in the first phase were configured to the interviewee's role and experience. The scope and nature of these early interviews were limited because relatively few ACCSOs had completed WYP sessions and QA procedures were still being developed. Second phase interviews focused on documenting these procedures, changes during the review period, variation in implementation, experiences delivering planning sessions, and other issues raised during the first phase. Where appropriate, issues are attributed to ACCSOs (including Senior ACCSOs), QA staff (RCs, WYP ACCSOs, BIU trial coordinators, and ASU direct management; these interviewees directly supervised ACCSOs or program operations), or other stakeholders (this group included program developers, Magistrates, executives and managers not directly involved in program operations). ${ }^{10}$

## Results

The results are presented in three sections matching the conditions necessary for implementation. The first section examines identification and engagement of eligible defendants, and specific barriers and facilitators of these components of implementation. The second examines the delivery and followup processes, and relevant barriers and facilitators. The third examines data collation and quality assurance processes. As a general overview of trial activity, Figure 2 summarises the number of defendants recorded at each stage over the review period.

## Identification and engagement

As indicated earlier, ACCSOs were expected to access court lists one week before their expected appearance date in order to identify defendants who were potentially eligible for inclusion in the trial. During treatment weeks, ACCSOs would then approach the defendants on the day of the ADVO hearing and offer WYP (explain the program and invite them to participate in the planning session). During comparison weeks, ACCSOs would not offer WYP and would provide routine court support. All adult Aboriginal defendants issued an ADVO by the court were eligible for the trial (unless remanded in custody after their hearing). Whilst these criteria were simple and explicit, interviews revealed that the process of identifying eligible defendants was inherently complex and often challenging.

Most ACCSOs readily adopted (or continued) the practice of reviewing court lists in advance. Court lists were emailed to ACCSOs by court registries, and some WYP ACCSOs also supplemented this process by disseminating court lists to ACCSOs in their region. Court lists were also updated each morning to include any newly listed matters for the day. This process allowed ACCSOs to identify defendants listed for an ADVO matter and/or those eligible for other ASU programs (at least in cases where the defendant was already known to be Aboriginal). ACCSOs were only supposed to offer WYP to defendants with a finalised ADVO (i.e. an interim or final ADVO that was fully determined by the court, not withdrawn, and for

Figure 2. WYP trial activity

which no further court proceedings were required). However, the pre-trial period (i.e. prior to October 2017) revealed that many defendants were difficult to locate or engage after their matter had been dealt with. ACCSOs indicated that they could not be present for every hearing and in some cases needed to identify the outcomes of a hearing through other sources (including JusticeLink, court papers, or advice from court staff). Thus, the program was adapted to allow (and indeed encourage) ACCSOs to approach eligible defendants before their hearing, which is consistent with pre-existing ACCSO practice.

Identifying Aboriginal defendants provided a separate set of challenges. Court lists indicate the nature of each matter (and in some cases the offence) but do not indicate a defendant's Aboriginality. ACCSOs therefore needed to rely on many other sources, including their personal knowledge of a defendant or their family, of surnames of Aboriginal families in the local
area, of familiar faces, and even a general visual assessment of a person's likely Aboriginal background. However, they noted that this information was insufficient because (i) defendants were not necessarily from the local area, (ii) ACCSOs varied in how familiar they were with the community they serviced, and (iii) appearance alone is not always reliable. ACCSOs' primary external source was the Aboriginal Legal Service (ALS). ALS provided advice about names and directed some clients to ACCSOs. ACCSOs examined waitlists of defendants requesting ALS representation posted outside ALS offices in each court, and consulted representatives of other agencies who were present at the court on the day, including Legal Aid solicitors, Police Domestic Violence Liaison Officers (DVLO), Women's Domestic Violence Court Advocacy Service staff (WDVCAS), Community Corrections staff, and court staff. ACCSOs also pieced together indicators of Aboriginality from JusticeLink (e.g. records of previous representation by ALS), the ASU and WYP databases.

Despite the many potential sources of information, Aboriginality was often unknown prior to and sometimes after the sitting day. ACCSOs reported that asking defendants "who's your mob" helped to identify those who were Aboriginal. Identification was therefore fundamentally tied to engagement. Still, it was difficult for ACCSOs to identify all Aboriginal defendants on their court list and/or all ADVO defendants, particularly in high volume courts where only a small proportion of defendants were Aboriginal. 'Known' Aboriginality was also subject to change, as some defendants thought to be Aboriginal or non-Aboriginal indicated otherwise when approached. Ultimately, 39 ACCSOs identified a total of 1,031 eligible Aboriginal ADVO defendants across 44 of the 45 courts during the review period. Using COPS data we estimate that a total of 3,204 Aboriginal POls were issued a final ADVO at these 45 courts during this period. This suggests that ACCSOs identified at least one third (32.2\%) of estimated eligible defendants. ${ }^{11}$

There was considerable court-level variation between the volume of eligible defendants and the rate at which they were identified, and this can be seen in Table 1. The first column of Table 1 lists the WYP courts, ranked from highest to lowest in terms of the estimated number of Aboriginal POIs issued a final ADVO during the review period (from COPS data), which is shown in the the second column. The third column shows the number of eligible defendants that were identified by ACCSOs. The fourth column estimates the identification rate (eligible defendants as a percentage of the estimated number of Aboriginal POIs). ${ }^{12}$ The table shows considerable variation across courts in the estimated identification rate. Identification rates were slightly higher (in aggregate) at courts with smaller estimated eligible populations.

Significant changes to implementation were made in the first months of the review period in response to initial concerns about the variability in identification and uptake across the various WYP courts. These changes included the development of QA procedures, expanded inclusion criteria, and new measures to promote uptake. Comparing October to December 2017 data with January to April 2018 data suggested these strategies had some success in increasing identification rates with no adverse impact on WYP delivery. The analysis showed that ACCSOs identified a higher proportion of eligible defendants in 2018 ( $35 \%$ vs. 28\%) than 2017 but delivered the WYP session to the same proportion of eligible defendants in both periods (28\%; see following section).

There was a general consensus among those interviewed that an exhaustive list of eligible defendants would have facilitated identification. Many ACCSOs and QA staff suggested that a consistent Aboriginal identifier on JusticeLink, or access to the Police-held list of Aboriginal defendants would have facilitated their work. Some ACCSOs were able to consult COPS through their local DVLO to check the Aboriginality of defendants on their court list. However, in most courts and for the majority of the review period ACCSOs were unable to access COPS data. Access has since been negotiated with NSW Police but the utility of this data remains unclear. Some ACCSOs and QA staff were uncertain about the viability of the COPS list, because self-identification can be fluid (defendants may identify as Aboriginal in one

Table 1. Number of Aboriginal Persons of Interest issued a final ADVO, number of defendants identified by ACCSOs, and percentage identified, by court ( $\mathrm{N}=45$ )

[^0]context but not in another) and because ACCSOs also apply a different method of identification. Recent reports also suggest that ACCSOs identify a somewhat different and smaller set of defendants than are identified in the COPS data. ${ }^{13}$

ACCSOs reported several methods for engaging defendants. Some posted signage or signalled their presence through announcements or walking the courthouse with a visible ASU lanyard. Others reported using more targeted approaches, such as standing with a court service assisting Aboriginal defendants (e.g. ALS) and either seeking referrals or directly approaching defendants to offer ASU services. Some ACCSOs reported visiting persons in custody. Defendants were engaged prior to entering the courtroom wherever possible as initiating engagement afterwards was seen as less successful. Engagement often involved multiple attempts to locate and speak with a single individual at court.

Many court personnel attempted to facilitate engagement with ACCSOs. Some registrars and court officers directed ADVO defendants to see ACCSOs, allowed WYP materials to be displayed in the courthouse or provided private rooms to facilitate engagement and delivery of the WYP session. Magistrates' involvement was generally considered easier to seek in smaller courts as they were typically presided over by just one or two magistrates. Some magistrates directed defendants to see ACCSOs, and some had agreed to explicitly issue interim orders (to defendants with provisional ADVOs) to facilitate eligibility for WYP. One view from the magistracy was that they had limited capacity to facilitate engagement because they often do not know whether a defendant is Aboriginal. ACCSOs successfully addressed this in one court by working with court officers to notify magistrates if an eligible defendant was Aboriginal and thus eligible for ASU services, so that the magistrate could direct defendants to see the ACCSO after their hearing. ${ }^{14}$

The use of multiple engagement methods was seen to be most effective and ACCSOs were encouraged to innovate and share their experiences at regional and QA team meetings. Engagement with eligible WYP defendants, however, was complicated by competing demands on ACCSOs' time from non-ADVO Aboriginal defendants and court users, some of whom were already existing clients. While ACCSOs were directed to prioritise potential WYP clients over others eligible for ASU services, in practice this was not always possible.

All eligible defendants are meant to be recorded in the WYP database and allocated to the treatment group (WYP and any other services for which the defendant was eligible) during treatment weeks or to the comparison group (services other than WYP) during comparison weeks. Postcards explaining the program were handed to defendants to inform them of the service, and defendants who did not initially accept the offer were invited to reconsider after their matter was finalised. Once a defendant was engaged, ACCSOs would also complete the ASU client assessment form with new clients and may also do so with returning clients.

A total of 520 defendants were identified in treatment weeks, of which 374 attended court and thus entered the treatment
group. Substantial proportions of the treatment group were female $(28.3 \% ; 106 / 374)$ or aged under 25 years of age ( $31.6 \%$; $115 / 374)$, just over half were issued a final rather than an interim ADVO (52.7\%; 197/374) and more than half had a concurrent charge (56.2\%; 210/374). ACCSOs offered WYP to 283 defendants ( $75.6 \%$ of the treatment group) and the remaining 91 (24.4\%) were not offered WYP. A total of 108 defendants accepted the offer $(28.9 \%$ of the treatment group or $38.2 \%$ of those who received an offer), and 175 ( $46.8 \%$ of the treatment group) did not accept the offer, meaning that they either declined or did not respond to the offer within 72 hours. A total of 360 defendants identified in the comparison weeks attended court and thus entered the comparison group. Characteristics of defendants in the comparison group were found to be similar to the treatment group, with bivariate statistical tests showing no significant difference in gender, age, concurrent charges, or ADVO type.

Table 2 shows the offer and acceptance rate of WYP for each of the courts included in the trial. Column 1 shows the court number, corresponding with Table 1. Column 2 presents the number of eligible defendants that attended court during treatment weeks and who were identified by ACCSOs, columns 3 and 4 the number and percentage of attendees who were offered WYP, and columns 5 and 6 the number and percentage of defendants who accepted WYP. As seen here there was wide variation in engagement across courts.

Despite a high level of motivation amongst ACCSOs to deliver WYP, non- or incomplete engagement was a major source of attrition. Of the eligible defendants identified by ACCSOs, one in four were not offered WYP. The interviews with ACCSOs revealed that this attrition was largely due to a shortage of time to approach defendants. ACCSOs had a narrow window within which to locate, engage, and deliver WYP. The process of engaging, assessing, completing WYP, as well as providing other services, typically took at least half an hour per client. Many ACCSOs indicated that they could not meet demand due to being occupied with other clients. Some ACCSOs noted that busier days were most challenging, particularly days where both ADVO and charge matters were listed for hearing as defendants could be eligible for a range of ASU programs. ACCSOs reported difficulties locating defendants in more complex court layouts (including those with many levels and courtrooms). Absences from court (due to outreach or leave) also resulted in non-offers.

ACCSOs did not routinely ask defendants why they had declined, but in interviews ACCSOs suggested that these defendants were generally reluctant to engage in any interaction and some defendants were specifically reluctant to discuss DV. The personal nature of the matter and the presence of the'person in need of protection'(PINOP) sometimes necessitated a more private space than was available at the court.

The voluntary nature of WYP was seen as both a facilitator and barrier to uptake. Some defendants reportedly declined to participate because they did not want to take on any additional demands at court but it was also suggested that had the program been mandatory, this would have deterred some defendants from engaging or potentially reduced the quality of engagement.

Reflecting on defendants that were willing to engage in a general discussion but not in WYP, members of different interviewee groups noted that DV was seen as shameful by many defendants and that they may have been reluctant to discuss DV specifically. However, the DV focus of WYP was also seen as a potential facilitator of uptake, with some ACCSOs suggesting that defendants with ADVOs involving current relationships or shared children were particularly responsive.

ACCSOs' motivation to deliver WYP was seen as a pre-condition to uptake, and the unusually low uptake in one court was largely attributed to the absence of this motivation. However, ACCSO motivation alone was not sufficient to ensure uptake, given the varying levels of motivation among defendants and the program's voluntary nature. Motivational interviewing skills (MI) were identified as a likely facilitator of uptake. MI skills were not an explicit requirement or component of the original WYP training, nor of ACCSOs' existing role description. One RC noted that such skills were expected only in higher-graded positions but had also been demonstrated by some staff that had not trained in MI but had a natural ability to do this. However, on the basis of higher uptake rates among ACCSOs experienced in MI (e.g. through prior casework/social work) and the perceived benefits of MI skills, MI training was subsequently delivered to all staff in June 2018.

A critical issue for the outcome evaluation is consistency in the identification of eligible defendants and the recording of court attendance during treatment and comparison weeks. WYP data showed that overall, there was good balance across treatment and comparison weeks with regard to the identification of Aboriginal ADVO defendants, with half (50.4\%) of the total 1,031 defendants identified during treatment weeks. There was also no evidence of systematic imbalance across treatment and control weeks for the majority of courts included in the trial ( $50 \%+/-$ $10 \%)$. WYP data indicated that the recorded court attendance rate for those identified as Aboriginal was also similar across the treatment and comparison weeks ( $71.9 \%$ in treatment weeks and $70.5 \%$ in comparison weeks), and further, there was reasonable balance in attendance rates for the majority of WYP courts (with most reporting rates within a $20 \%$ range of the mean).

## Delivery of WYP session and follow-up

Engagement of defendants and delivery of WYP were partially overlapping, because ACCSOs were asked to deliver the first component of WYP (explain ADVO conditions along with their practical implications for the client's daily life) with defendants before offering WYP. Many ACCSOs described this as standard pre-existing ASU practice with ADVO defendants prior to WYP and so were easily able to engage defendants in this discussion during the WYP trial. ${ }^{15}$ Defendants who accepted an offer to participate in WYP would then commence the planning session. ACCSOs were supposed to offer defendants who did not agree to participate in WYP any other available services (including general court support and other specific programs), although ACCSOs were advised to prioritise WYP.

The main distinction between WYP and the services offered to the comparison group was the planning session. This session
involved identifying a reason to comply with the order and a specific obstacle to compliance, creating an 'if-then' plan to manage the obstacle and then designing an SMS reminder and schedule. Of the 108 eligible defendants who accepted an offer to participate, 104 completed the planning session and 97 had complete and valid data for all four of the plan's components (goal, motivation, obstacle, and plan). Once the planning session was complete (and ACCSOs had provided any non-WYP services to the defendant as required), ACCSOs were to schedule SMS reminders, make follow-up phone calls and revise plans in the week after the planning session (or as requested). These provisions for follow-up were the second distinguishing component of WYP and are addressed further below.

Planning sessions were supposed to be completed in-person on the day of court and this occurred for 99 of the 104 completed sessions. ACCSOs completed two sessions by phone and three in person at a later date. Although the planning session was intended to be delivered after the defendant's order was finalised, exceptions were made in some cases during the review period on the proviso that ACCSOs would re-engage the defendant and revisit their plan if the ADVO or its conditions changed. The number of occasions on which this occurred is unknown.

Many ACCSOs indicated that the public spaces in the courthouse in which they usually provided services were not conducive to the WYP session. Suggested solutions to this problem included use of dedicated ACCSO offices (where available), negotiating room space (although availability was often limited and unpredictable, particularly on AVO list days), and sometimes conducting the session outside the courthouse (which was also preferred by some defendants). However, delivery of WYP in these spaces reduced ACCSOs awareness of other defendants who may have also been potentially eligible for the trial (including their physical movements or announcements about defendants). ACCSOs indicated that many defendants benefitted from assistance with formulating or physically writing down plans and that the'if-then' cards were well received. The plans generated tended to be brief and non-specific (e.g. If:"she calls me"; Then: "don't answer"). BIU examined planning data for evidence of best practice (including positive, measurable, time-limited goals, obstacles relating to the self, and future focused plans) and identified several high quality plans, for example:

## Goal:"To get married"

## If:"I get wild"; Then: "Go for a walk to my cousin's place"

A number of ACCSOs and QA staff described plan-making as being something unfamiliar to Aboriginal ADVO defendants. In that context, WYP was seen as filling an important gap, but also as potentially challenging to deliver. Training of ACCSOs included a role-play component in which they practiced the planning session with other ACCSOs. Several ACCSOs suggested that completing a plan with a defendant (rather than in roleplay) demystified the process, and some ACCSOs described a growth in confidence over several occasions of completing the WYP session. Unfortunately, many ACCSOs experienced long delays between training and opportunities to deliver WYP (for

example, ACCSOs completed their first WYP session a median of four months after completing their initial training in WYP), and thus to establish and reinforce the training material. Without such real-world practice, deviations from practice are more likely.

SMS messages and message schedules were developed for 71 defendants (of the total 104) who completed the planning session. Most ( $\mathrm{n}=87$ ) of the 104 defendants agreed to a follow-up phone call. There were no recorded follow-up provisions for eight defendants. ${ }^{16}$ Preliminary analysis using data supplied by BIU (Jenny Chalmers, personal communication, 21 September 2018) shows that the large majority of scheduled SMS messages were successfully delivered. ${ }^{17}$ However, the number of defendants who received messages is not yet known. There were few reports of participants revising their plan or seeking to cancel reminder messages, and several reports of positive client feedback regarding the SMS.

ACCSOs indicated that some defendants were reticent or unable to provide a mobile phone number for the SMS reminders. In some of these cases ACCSOs used an alternative client messaging system or their personal mobiles to support or contact clients. However, ACCSOs also said that ADVO defendants (in particular females) may be concerned about a partner seeing their reminders. Some ACCSOs made arrangements to follow-up in person with defendants who had limited phone access. Records of attempted follow-up calls were present for around half of defendants who requested one. Defendants were not easily reached, with only half of those called answering or responding to the ACCSO. Some ACCSOs noted that clients change phone numbers regularly, which could contribute to this problem.

## Data collation and quality assurance procedures

WYP employed numerous data collation and quality assurance (QA) procedures to support the operation and monitoring of the trial. These were developed and refined over the review period. ${ }^{18}$ The potential for adaptation over time and place meant that QA procedures could not be systematically assessed for this study. Some QA material was recorded locally, and local adaptations to procedures for collating/checking these data were permitted. For example, ACCSOs in one region recorded Aboriginality and recruitment outcomes for all defendants on their court list (not just known Aboriginal defendants, which was the standard procedure). This method was tested in some other courts during the review period to gauge the demand for and volume of ACCSOs' work but was not always viable. Variations in ACCSOs' workflow also required some flexibility with QA timeframes.

WYP ACCSOs (ACCSOs with additional training and appointed specifically to deliver and support WYP) were responsible for monitoring and raising concerns about data entry. These staff reported that ACCSOs typically entered data with minimal error and within the appropriate timeframes. Widespread feedback indicated that data collation improved over the review period. Problems with data entry (including errors and delays) were largely resolved through informal peer support by WYP ACCSOs or by providing a second 'refresher' training session. A few reports of significant, persistent data entry issues were referred
to regional coordinators ( RCs ) for performance management or to the QA Coordinator for investigation and individual coaching assistance as required. QA staff noted the absence of a reliable list of eligible defendants as a barrier to QA because, without a clear sense of the volume of potentially eligible defendants at each court, it was difficult to quantify expectations for trial activity and thus explore disparities in performance.

Other issues were not performance-related. There were technical constraints that meant some reporting targets could not always be met. For example, ACCSOs were required to submit the outcome of all eligible matters by 5 pm each Friday, but outcomes may not be known until the following Monday. Examples of JusticeLink data conflicting with ACCSOs' direct knowledge of matters (e.g. whether or not a defendant had attended court) were also noted. To the extent that it was up-to-date and accurate, the WYP database allowed ACCSOs to reliably identify which defendants had been allocated to the trial and which defendants could still be allocated. As the WYP database allowed only one record per defendant, ACCSOs also relied on the main ASU client database and their eligible client checklists for information about interactions with WYP participants. However, the consensus among ACCSOs and QA staff, also supported by the available data, was that the move to a shared online database had greatly simplified data entry and monitoring, and largely eliminated duplicate records.

Fortnightly half-hour QA teleconferences were held in which all regions reported on their progress and were given an opportunity to discuss implementation issues. These meetings were well attended and provided valuable insight into situations where WYP practice was deviating from the intended treatment model (e.g. sending compliance-related SMS reminders to defendants in the comparison group). Had these issues remained undetected and unaddressed they could have ultimately jeopardised the integrity of the trial. The frequency and openness of these meetings was therefore critical to implementation.

Data collation and QA for WYP added substantially to ACCSOs' existing tasks, with at-least weekly use of local checklists and the WYP database often involving accessing JusticeLink and other court files. WYP ACCSOs additionally monitored and assisted staff across their region, with RCs supervising and managing performance on WYP and all other service delivery. Increased uptake, new courts and staff, and evolving procedures, contributed to reported difficulties with the QA workload. Most difficulties were transient, but QA workloads impacted on the capacity of some staff to deliver WYP. Management also noted that trial data were insufficient for monitoring ACCSO activity (and thus adherence to identification and engagement procedures), pointing to a need for time-intensive local file reviews and analysis of services recorded in the main ASU database.

The evaluation supported QA through regular monitoring and formal reviews of trial data extracted by the QA Coordinator from the WYP database. Data cleaning by BOCSAR identified explicit anomalies in 10 percent of the supplied records. Most anomalies
were resolved within a two month period and were mostly minor, typographic and non-systematic (e.g. incorrectly recorded court appearance dates). Serious anomalies involving non-adherence to trial protocol were much less common in the data provided. These included offering WYP during comparison weeks, to ineligible defendants (e.g. those in custody or not issued a valid AVO), and defendants who had already participated in the trial.

## Discussion

The purpose of this process evaluation was to assess (1) whether WYP was implemented as intended, and (2) identify barriers and facilitators in the intended implementation of WYP. Effective implementation for the purposes of this study was defined as adherence to the conditions listed in the Aim section of this report.

During the seven month review period, ACCSOs identified 1,031 defendants as eligible for the WYP trial across the 45 participating courts. The treatment group comprised the 374 defendants (including 106 females) who attended court during treatment weeks; 283 of these were offered WYP, of whom 108 accepted and 104 completed a WYP session. Balance in identification and delivery across treatment and comparison weeks is necessary for the outcome evaluation and was generally observed. Data and interviews with ACCSOs and QA staff suggest that implementation varied among ACCSOs but was generally followed. These results are impressive given the context of substantial barriers to implementation, detailed requirements of the evaluation design, and the diversity (e.g. prior training and work experience) of the ACCSO workforce.

The overall identification rate was less than half of the estimated eligible population (according to COPS data) for the trial. Identification rates varied widely between courts with comparable characteristics, which suggested some localised barriers to implementation. ${ }^{19}$ A critical factor affecting identification was the lack of a definitive list of names of Aboriginal defendants and thus considerable time was spent in many courts identifying potentially eligible defendants. In many cases, identification was dependent on engaging defendants. The requirement to systematically approach defendants impacted on ACCSOs' work and was challenging, as they were previously not required to do this. However, substantial improvements in identification rates were achieved during the review period due to continued efforts to increase coverage and the introduction of major program enhancements (e.g. the WYP database and QA procedures).

The engagement process was impeded by the fact that ACCSOs often spent half an hour or more with a given defendant whilst delivering WYP and other services, during which time other potentially eligible defendants may have exited the courthouse. Physical restrictions of courthouses also limited ACCSOs'ability to reach all eligible defendants, and many courts have inadequate accessible private space. Almost all defendants who accepted WYP went on to complete the planning session. Two thirds of completers agreed to SMS reminders. Messages were invariably
delivered. Relatively few completers received a follow-up call, but when feedback on plans and reminders was received it was consistently positive. Data were also fully recorded for 93 percent of completers, confirming that the components of WYP were readily completed and documented.

Dedicated QA staff, QA systems and the WYP database were seen as key facilitators of implementation, enabling prompt detection and communication about implementation issues. QA staff provided valuable support to ACCSOs with delivery and reporting procedures, as well as regular feedback to management, designers and the evaluators. QA meetings and training helped to reinforce basic practice, enhance existing skills and share innovations, and to introduce new procedures and correct the confusion that sometimes arose from changes to the program or to the trial (such as the expansion of eligibility criteria). One related limitation was that data collation and reporting efforts added to workloads and sometimes affected capacity to deliver WYP. However, close monitoring, as undertaken in the course of this evaluation, can aid implementation during the remainder of the trial, in particular by gauging the success of efforts to increase engagement and their potential impact on workload, completion rates, and trial balance.

The key facilitator of intended implementation for WYP was the widespread enthusiasm from ACCSOs and management to participate in the trial and respond to emerging challenges. The involvement of Aboriginal staff in the design and delivery of the program was a supporting factor. Program expansion and development were well monitored but nevertheless placed strains on implementation and monitoring. The review period commenced before QA systems were embedded and before the database was fully operational and up-to-date with records of trial activity. Few ACCSOs had previously been required to deliver or monitor a structured program and therefore some ACCSOs had to develop skills in administration and/or engagement. The small volume of willing defendants in many courts, however, restricted opportunities to practice and gain confidence which resulted in the program taking longer than expected to 'beddown'.

Perhaps the most consistent barrier to implementation was the narrow window available to ACCSOs to locate and deliver WYP with voluntary clients and competing demands on ACCSOs time, especially on busy court days. ACCSOs had to balance delivery of WYP with its considerable administrative requirements while providing support to other clients and staff. These challenges were eased by teamwork among ACCSOs to manage workloads and skills/knowledge gaps, and by working collaboratively with other staff at court. Interviews also suggested broader benefits of the trial to ASU including workforce professionalisation.

## Sample interview schedule

What strategies have been used to identify and engage ADVO recipients at court?

Which defendants are more/less willing to participate?
How do you typically progress through the planning session?
Which components of the planning process have been easier/ harder to implement?

Is your court's infrastructure and environment conducive to delivering WYP?

What adaptations have you made (or would you make) to help you implement WYP?

Do you have the skills required to effectively deliver WYP?
What features of training were more/less effective in preparing you to deliver WYP?

Has your participation in this trial affected how you practice during comparison weeks?

How have quality assurance procedures influenced implementation?

How have external stakeholders influenced implementation?

## Acknowledgements

BOCSAR gratefully acknowledge all ACCSOs and ASU staff, and the team at BIU for their ongoing participation and commitment to this evaluation. Particular thanks to Eva Koromilas (BIU project manager) and the QA team (including Jeremy Smith). Penny Josey, Jenny Chalmers, and Kylie Routledge provided data and valuable comments throughout the evaluation. Thanks also to Suzanne Poynton, Don Weatherburn and BOCSAR colleagues for guidance on design and reporting.

## Notes

1 Section 5 of the Crimes (Domestic and Personal Violence) Act 2007 (NSW), defines 'domestic relationship' more broadly for Aboriginal defendants to include extended family or kin.

2 Data collected during the pre-trial period does not form part of BOCSAR's evaluation.

3 During comparison weeks, ACCSOs were to continue providing routine court support to ADVO defendants. Routine practice varied; prior to the trial, some ACCSOs routinely approached ADVO defendants to explain their order while others did not.

4 This condition relates to implementation of the evaluation, rather than the program itself.

5 The 45 included courts were: Armidale, Ballina, Batemans Bay, Bourke, Brewarrina, Broken Hill, Campbelltown, Casino, Coffs Harbour, Condobolin, Coonabarabran, Coonamble, Cowra, Downing Centre, Dubbo, Forbes, Forster, Gilgandra, Gosford, Grafton, Griffith, Kempsey, Lake Cargelligo, Lismore, Macksville, Maclean, Moree, Moruya, Mt Druitt, Narrandera,

Narromine, Newcastle, Nowra, Orange, Parkes, Tamworth, Taree, Toronto, Wagga Wagga, Walgett, Wellington, Wentworth, Wilcannia, Wollongong, and Wyong.

6 Under section 34(2) of the Crimes (Domestic and Personal Violence) Act 2007 (NSW), if a court purports to continue a provisional ADVO, the ADVO is taken to be an interim ADVO made by the court at that time.
$7 \quad$ ACCSOs allocated all eligible defendants to the trial during the review period (whether or not they attended court) to facilitate a comparison of attendance rates and recording processes in treatment and comparison weeks. After this time, ACCSOs were only required to allocate eligible defendants who attended court.

8 Self-identification can be fluid; individuals may not selfidentify as Aboriginal in every police-recorded contact.

9 Less than 1 in 20 (4.4\%) Aboriginal defendants who received a final ADVO between October 2013 and April 2014 received another final ADVO during that seven month period (analysis of Poynton, Stavrou, Marrott, \& Fitzgerald's 2016 dataset).

10 WYP ACCSOs also delivered WYP but are grouped here with QA staff by virtue of the additional training they received in WYP and their much greater exposure to QA processes. Some distinctions between interviewees were arbitrary, for example some stakeholders were occasionally involved in QA processes.

11 The precise proportion is unknown but exceeds 32.2 percent $(1,031 / 3,204)$ because a small proportion of defendants are double-counted in the denominator (i.e. the POI-based estimate). However, to the extent that the available measure is consistent across courts, court-level variation from the overall proportion may indicate higher or lower levels of identification and thus population reach.

12 Defendants could become eligible for the trial during treatment or comparison weeks. A minority of courts (including only 2 of the 20 courts with the highest estimated volume of eligible defendants) also observed 'non-trial' weeks during the review period to ensure a balanced number of treatment or comparison weeks by the end of the trial period. Defendants whose court dates occurred in non-trial weeks were included in the eligible population but were not included in the trial. Other defendants in the eligible population but not in the trial were those with court dates in treatment or comparison weeks during the review period but prior to the trial commencing at their court.

13 After the review period, a list of COPS-identified Aboriginal defendants was supplied to ACCSOs in a number of courts. Anecdotal feedback has been that persons identified as Aboriginal in the COPS data but otherwise unknown to ACCSOs have tended to be false positives, i.e. defendants that ACCSOs identified as non-Aboriginal (Jeremy Smith, personal communication, 12 September 2018). More systematic monitoring is required to ascertain the overlap between the two lists and the net benefit of drawing on COPS data.

14 This process was introduced in some further courts after the review period. The impact of this process is not yet known but some ACCSOs have observed their magistrates making referrals, indicating some uptake of the process.

15 Practice with eligible defendants in comparison weeks varied among ACCSOs. Some ACCSOs sought out defendants to complete this discussion, some ACCSOs did so reactively (i.e. if approached by an eligible defendant), and other ACCSOs indicated that they avoided contact with defendants in comparison weeks.

16 Defendant-level outcomes of SMS and phone follow-up were not available when this report was written.

17 This approximates the experience for the 71 defendants who agreed to receive SMS reminders. It was not possible to match the messages with these 71 defendants.

18 As an example of a QA procedure, WYP ACCSOs were to send regional data to regional coordinators each week.

19 The potential for geographic variation in police recording of Aboriginality was not explored in this evaluation, but if this exists this could explain some variation in identification rates between courts.

# The impact of the 'What's Your Plan?' program on ADVO breaches and domestic violence 

Min-Taec Kim

## AIM

The aim of this study is to estimate the causal impact of the `What's Your Plan' (WYP) program on rates of Domestic Violence (DV) related offending by Aboriginal defendants issued an Apprehended Domestic Violence Order (ADVO).

## METHOD

The 'What's Your Plan' program was only available to Aboriginal defendants receiving a finalised ADVO between March 2017 and October 2019. The availability of this program was quasirandomised, only being offered to defendants on alternate weeks. If this allocation of the program was 'as good as random', this allows us to estimate the causal impact of 'What's your Plan' on rates of DV related offending.

Our analysis considered two offence types as primary outcome measures: any new breach ADVO offence and any new proven DV charge. For both these offence types, the likelihood of the offence occurring within 3,6 , or 12 months and the number of days until the offence occurred (if ever) were considered. We estimated the average treatment effect for two groups of interest:

- all defendants allocated to receive the program regardless of whether they ultimately received the program (an intention-to-treat estimate);
- all defendants who accepted and received the program (a treatment-on-treated estimate).

For the intention-to-treat analysis, the impact on the likelihood of the offence occurring was estimated using a logistic regression model, and the impact on the number of days until the offence occurred (if ever) was estimated using a tobit regression model. For the treatment-on-treated analysis, the analogous instrumental variable model was used for each outcome measure.

## RESULTS

We find no evidence for any causal impact of the 'What's Your Plan' program on breaches of ADVOs or DV-related charges. For each of our outcome measures, we estimate small differences between those that were allocated to receive WYP and those that were not. Differences were larger when comparing those that were offered and received the WYP program with those not allocated to the program but less precisely estimated. None of these differences were statistically significant at conventional levels.

Using an observation period of 12 months after trial entry, we observed a 1.6 percentage point (p.p) reduction in ADVO breaches and a 1.2 p.p. reduction in DV related offending for those allocated to receive WYP. Time to first new breach and DV charge also increased by 13 and 10 days, respectively. Three and 6 -month differences were smaller and/or in the opposite direction than expected. None of these differences were statistically significant.

Comparing those that were offered and received the program to those receiving business-asusual, again using an observation period of 12 months after trial entry, we observed a 4.1 p.p. reduction in ADVO breaches and a 3.1 p.p. reduction in DV related offending. Time to first new ADVO breach and DV charge also increased by 35 and 24 days, respectively. Again, differences at 3 and 6 months were smaller and/or in the opposite direction than expected. Again, none of these differences were statistically signficant.

## CONCLUSION

This evaluation finds no evidence that the 'What's Your Plan' program is sufficient to reduce DVrelated offending for Aboriginal defendants. This does not imply that a program like WYP aimed at enabling self-directed behavioural changes and overcoming behavioural barriers would not be effective within a suite of other programs, supports and resources.

## Behavioural insights

INTRODUCTION

Apprehended Domestic Violence Orders (ADVOs) are civil court orders designed to protect individuals from ongoing domestic violence and prevent re-victimisation. The number of ADVOs granted has steadily increased in NSW in the last four years, with 33,278 final ADVOS issued between April 2019 and March 2020, compared with 28,903 between April 2016 and March 2017, an increase of 15\%. ${ }^{1}$ This increase has been even more rapid for Aboriginal people, with the number of final ADVOs issued across the same period increasing from 9,159 to 10,988 (or 20\%).

Figure 1. ADVOs granted per month from April 2016 - March 2020, by Aboriginality of defendant

While the evidence suggests that ADVOs are associated with significant reductions in severe violence, breaches remain unacceptably high (Dowling et al., 2018). In 2016 and 2017, the NSW Department of Communities and Justice's Aboriginal Services Unit (ASU) and the Department of Premier and Cabinet's Behavioural Insights Unit (BIU) co-developed 'What's Your Plan' (WYP); a brief behavioural intervention designed to increase Aboriginal defendants' compliance with ADVOs.

This report estimates the causal impact of the WYP program on ADVO breach rates and domestic violence related offending based on a trial of this program with Aboriginal defendants. We can identify the causal impact of the WYP program because defendants were quasi-randomised to the program using an 'on week, off week' alternating allocation process.

## The effectiveness of protection orders

In NSW, any person who is, or has been, the victim of physical assault, threats of physical harm, stalking, intimidation or harassment in a domestic relationship and has a reasonable fear to believe that this behaviour will continue, can apply to the Local Court for an ADVO. The Crimes (Domestic and Personal Violence) Act 2007 (NSW) recognises a wide range of relationships as 'domestic'. The defendant could be currently or previously:

- a spouse of the person seeking protection;
- a de facto partner;
- in an intimate relationship with the protected person;
- living in the same household as the protected person;

[^1]- a long-term resident in the same residential facility as the protected person;
- dependent on the paid or unpaid care of the protected person;
- part of the protected person's Indigenous kinship system or extended family; and/or
- a relative of the protected person (including step- and in-law relationships).

If granted, the defendant named in the order must comply with three mandatory conditions: not to assault, harass or threaten the protected person; not to intimidate the protected person; and not to stalk the protected person. If these, or any other conditions set down by the court² are breached, the defendant can be charged with a criminal offence.

The existing research on protection orders suggests that they are effective in reducing violence, abuse, harassment and re-victimisation. Holt et al. (2003) interviewed 253 women in the USA who were granted a protection order and 195 women who had contact with police for a domestic violence incident but did not obtain a protection order. Each participant completed a baseline interview, and then two follow-up interviews at approximately 1 month and 9 months after obtaining the protection order or contacting the police. Women granted a protection order were found to be less likely to experience domestic violence, particularly between the first and second follow-up interviews.

Kothari et al. (2012) report similar results from a study undertaken in Michigan, USA. Using a propensity score matching approach, they compared rates of police recorded domestic violence incidents for women with protection orders with a group of "similar" women who had experienced violence but did not seek a protection order. Rates of violence were measured before, during and after the order was granted, as an annualised rate to allow for different lengths of follow-up time. Kothari et al. (2012) found that those with protective orders had higher police incident rates before the protective order was obtained, but similar rates whilst the order was in effect and after the order had expired.

The results from the US are echoed by a study conducted by Kelly et al. (2013) in the UK, which examined the impact of introducing a new type of protective order, domestic violence protection orders, in a 15 -month pilot. These protection orders were again associated with fewer incidents of domestic violence within approximately one year of the index event, compared to similar cases dealt with by arrest but where "no further action" ensued.

Evidence from NSW also suggests that protection orders are effective. Trimboli and Bonney (1997) used surveys and interviews to assess the prevalence of domestic violence victimisation across 115 individuals who received an Apprehended Violence Order shortly after the scheme commenced in NSW. The interviews took place at the time the orders were granted and then one, three and six months after the orders commenced. More than $90 \%$ of individuals reported that the protection order had produced benefits. The authors concluded that there was a reduction in physical assaults, threats, stalking and other forms of intimidation and harassment (pp. viii). These results were replicated nearly 20 years later by Trimboli (2014). She interviewed 147 individuals before and after they obtained a protection order in one NSW Local Court and found that six domestic violence behaviours (stalking, verbal abuse, contact others, intimidation, physical assault and threats of physical assault) decreased sharply whilst the order was in effect.

McFarlane et al. (2004) report somewhat conflicting results. They interviewed 81 women who applied for, and were granted, a protection order and 69 who applied but were not granted a protection order, about their experiences of violence at $3,6,12$ and 18 months after the protection order decision. The authors found that all women who applied for a protection order experienced lower levels of violence irrespective of whether they were granted the order. They suggest that there may be significant differences between those that apply for a protection order and those who experience violence but do not apply for

[^2]protection. If these differences are not accounted for then observational studies may be over-estimating the impact of the protection order itself.

Overall the evidence suggests that protection orders are effective in reducing violence, abuse and harassment, although the results from some studies showing a positive effect may be confounded by unobserved differences between women who are granted a protection order and those who are not. Importantly for our study, we were unable to find any research examining the extent to which protection orders are effective for vulnerable groups, such as Aboriginal people. This is an area where further research is clearly needed.

## Strategies for increasing compliance with ADVOs

While the evidence suggests that protection orders are effective in reducing the incidence of domestic violence, they do not eliminate the risk to victims entirely. Poynton et al. (2016) estimate that around one in five ADVOs are breached in NSW, with most of these breaches occurring within three months of the order being granted. Aboriginal defendants were found to breach ADVOs at a higher rate than non-Aboriginal defendants ( $24.6 \%$ vs $16.8 \%$ within 12 months), unadjusted for any differences in other characteristics. Males and younger defendants were also found to be more likely to breach their order sooner than other defendants. As highlighted by Poynton et al. (2016), the actual breach rate is likely to be significantly higher than their estimates suggest given that only breaches reported to or detected by police were included in the analysis. Given the evidence suggesting that Aboriginal defendants are more likely to be imprisoned for breaching an ADVO (Napier, Poynton, \& Fitzgerald, 2015; Nancarrow, 2016; Thorburn \& Weatherburn, 2018), this disparity likely has a range of serious flow-on impacts for Aboriginal people.

There is very little research on interventions that aim to enhance compliance with protection orders. One of the few studies in this area was undertaken by Trimboli (2014). She evaluated the impact of a legal advice service provided to defendants in ADVO proceedings on the frequency with which ADVOs were breached. Examining victims' experiences of proscribed behaviours before and after an ADVO was issued, Trimboli (2014) found that breach rates reduced by the same amount regardless of whether the legal service was made available to the defendant. This suggests that a lack of understanding of the consequences of breaching an ADVO is not the critical factor driving breach behaviour. The dearth of research in this area has led some to consider whether interventions shown to be effective in other areas of social policy could be adapted and applied in this context.

Mental Contrasting and Implementation Intentions (MCII) is a combination of two interventions from the psychology literature aimed at closing the 'intention-action' gap. MCII is designed to help those who have an existing goal but are having difficulty committing to their goal and striving towards that goal (Oettingen \& Gollwitzer, 2010). A Mental Contrasting (MC) intervention prompts individuals to imagine a desired future and contrasting that future with the present reality. This is intended to prompt the individual to consider the actions that are required to realise the desired future, energise them to take action, and strengthen their goal commitment. The Implementation Intentions (II) intervention prompts individuals to develop an "if-then" plan that prompts the individual to elaborate on what actions would need to take place to meet their goal. This helps individuals to get started and then stay focused on their goal in the face of obstacles. These interventions are seen to be complementary and are often delivered together to help people with goal attainment.

The intention-action gap is a problem that exists across a broad range of domains, leading to MCII being trialled in a number of disparate settings. Cross and Sheffield (2019) provide a systematic review and meta-analysis of the efficacy of MCII in changing health behaviours, such as smoking and unhealthy snacking. Based on a review of 12 studies they conclude that MCII can modify behaviour, at least in the short-term (i.e. for up to three months). There is also evidence to suggest that this intervention works to reduce alcohol consumption (Wittleder et al., 2019), improve academic performance in children (Duckworth et al., 2013) and help people regulate their anger (Gallo, 2018).

While these results are promising, there is no research to our knowledge that has considered whether MCII strategies are effective for improving compliance with court orders or indeed any research examining the use of MCII strategies within a criminal justice setting. ${ }^{3}$ If MCII strategies were shown to be successful in reducing the aggregate rate of court order breaches, this would imply that the 'intention-action' gap may be a critical barrier for ADVO compliance. However, there are several important differences between the context in which an ADVO is issued and the contexts in which MCII has been successfully trialled that may reduce or nullify the effectiveness of the intervention, including the lack of agency in receiving an ADVO (and thus in forming a goal to comply), the long-term nature of the outcome being measured and the outcome being dependent upon the other person in the relationship (rather than relating to just an individual's own goals and desired future).

## The 'What's Your Plan?' program

## Background

In 2016 and 2017, the NSW Department of Communities and Justice's Aboriginal Services Unit (ASU) and the Department of Premier and Cabinet's Behavioural Insights Unit (BIU) co-developed 'What's Your Plan' (WYP). The core element of the WYP program is its use of two self-regulatory behaviour change strategies:

1. Mental contrasting (MC) - Mental contrasting is a technique where individuals compare a desired future with their current reality (Oettingen \& Gollwitzer, 2010). For WYP, this involves defendants imagining a positive future arising from the benefit of complying (versus not complying) with their order.
2. Implementation intentions (II) - Implementation intentions foster goal implementation by having individuals create an "if-then" plan in which a specific cue triggers a desired behaviour (Oettingen \& Gollwitzer, 2010). For WYP, this involves defendants identifying an obstacle that could prevent them from complying with their ADVO and then developing a suitable plan to overcome this obstacle.

WYP was designed as a "process enhancement" for Aboriginal Client and Community Support Officers' (ACCSOs) existing frontline support work, providing a specific structure for their interaction with DV defendants. WYP underwent an extensive development and co-design process with ASU to clarify its operational requirements with the object of creating a program that would be considered culturally appropriate by ACCSOs, defendants and their communities. Co-design began with group consultation between ASU, Courts and Tribunal Services and other members of the WYP governance group (including NSW Police, Aboriginal Legal Services, and NSW Legal Aid) and invited representatives from DV program providers. Workshops were held with ACCSOs to refine the format and wording of the tool and planning sessions.

WYP was piloted in several NSW Local Courts from March 2017 to May 2017 and was rolled out to other courts from June to September 2017. One WYP ACCSO was appointed in each ASU region to deliver WYP, support other ACCSOs to implement WYP, and collate their region's data. Staff completed a one-day training session prior to delivering WYP. During this time, Quality Assurance (QA) procedures and an online program database were developed. Dedicated QA roles were also established. A QA Coordinator was appointed to train, observe, and coach ACCSOs in their implementation of WYP (including delivery of WYP sessions, data recording, and adherence to trial procedures). As part of this process, the Bureau of Crime Statistics and Research (BOCSAR) was engaged to conduct a process and outcome evaluation of WYP (Nelson (2018), and this document respectively). Further detail on the implementation and design decisions made for this program are provided by Nelson (2018).

[^3]We worked collaboratively with the NSW ASU and the NSW BIU to design the most rigorous evaluation design possible given the practical constraints on the ACCSOs to deliver the program effectively. ${ }^{4}$ This resulted in the ACCSOs alternating the weeks in which the WYP program was delivered, so the effectiveness of the WYP program could be compared against a realistic benchmark (e.g. services that would otherwise be available).

## The WYP program

The WYP program consisted of two key components:

1. The planning session, which includes the delivery of the MCII intervention;
2. Follow-up reminders, which includes a follow-up call and co-designed SMS prompts.

ACCSOs were emailed court lists by court registry staff one week before the expected appearance date to identify individuals eligible for the trial. While court lists identify the nature of each matter, they provide no information about the defendant's Aboriginality. This meant that ACCSOs had to rely on other sources of information, such as their personal knowledge of the defendant, surnames of families in the area, or even a general visual assessment to determine if the defendant was likely to be Aboriginal. Aboriginality was often unknown prior to meeting the defendant, particularly in high volume courts, and was confirmed once the ACCSO was able to meet with them in person. Nelson (2018) estimates that approximately a third (32\%) of all eligible defendants were identified when WYP was implemented, but the identification rate varied between courts, ranging from 10-70\%.

Once identified, ACCSOs approached eligible defendants in court following their court appearance and invited them to participate in a 30 minute session to talk through the conditions of their order and develop a plan to promote compliance. Eligible defendants were informed that the meeting was voluntary and further information would be provided on request.

The initial planning phase of the session took roughly five minutes, and was spent discussing:

- the conditions of the ADVO and the implications of the order for the defendant's daily life;
- reasons and motivation for compliance; identifying obstacles and barriers to compliance; and creating an action plan for dealing with obstacles (e.g. the MCII intervention).

A summary of the action plan was then recorded on paper folded to the size of a business card containing:

- the defendant's goals;
- their motivation;
- an if-then plan and concrete actions the defendant could take in situations where there was a risk of breaching the order.

The ACCSO and participant also agreed on a time for a follow-up call (to occur 2 to 7 days later), where the ACCSO would remind the participant about their plan and adapt it as necessary. Some participants also co-designed SMS prompts to be sent by the ACCSO to the defendant at agreed times and frequencies in order to support the defendant at times likely to be high risk.

[^4]The graph below shows the number of individuals in the trial and the proportion who received each component of the intervention. A total of 3,751 individuals took part in the trial, with individuals allocated to either receive WYP or receive business-as-usual (BAU) services on alternating weeks, using the date for their first appearance at court for their ADVO. Using this allocation, 1,918 people were allocated to receive WYP ( $51 \%$ of those in the trial), 1,088 ( $57 \%$ of those allocated) were offered the program and 499 ( $46 \%$ of those offered, $26 \%$ of those allocated) ultimately accepted the offer and received WYP. The majority ( $72 \%$ ) of those who received WYP also received the follow-up call and SMS reminders.

Figure 2. Number and percentage of participants in the trial that received each component of the treatment

There were a number of logistical barriers that prevented some defendants who were allocated to WYP from ultimately being offered the program. ACCSOs had a limited amount of time to find and engage each client before the client left the courthouse, and if the individual accepted the offer, the WYP program typically took at least half an hour to deliver. This, along with a high existing workload, meant that ACCSOs were unable to meet the demand for the program. ACCSOs did not routinely ask why individuals declined the program, but interviews with stakeholders suggested that some defendants were reluctant to engage in any program, and were particularly reluctant to speak about domestic violence in a setting where the person in need of protection was potentially nearby (Nelson, 2018).

## The current study

The 'What's Your Plan' intervention was only available to individuals receiving a finalised ADVO in alternating weeks who were identified as Aboriginal by the ACCSOs. This quasi-random assignment to treatment is the critical element of the WYP trial from an evaluation perspective as it allows for causal estimates of the treatment on offending to be generated if allocation is "as good as random" (Fisher, 1935; Pearl, 2009). In this report we investigate both the average impact of WYP on those who were allocated to receive the program (i.e. intention-to-treat; 1,918 individuals in our study) as well as the average impact on those who were offered and received the program (i.e. treatment-on-treated; 499 individuals in our study).

We are primarily interested in the effect of participation on breaches of ADVOs, as measured by whether a breach occurred within a specified period (three, six or twelve months), and the number of days until the first breach (if there is one). However, we also present evidence on the impact of WYP on domestic violence related offending behaviour within three, six and twelve months of the initial court appearance. ${ }^{5}$

[^5]
## METHOD

## Data source

We have used two sources of data for this evaluation:

1. Data on eligibility for and participation in the WYP program provided to BOCSAR by ASU;
2. Data on offending outcomes drawn from the BOCSAR reoffending database (ROD).

WYP program data were collected by 57 Aboriginal Client and Community Support Officers (ACCSOs) working across 55 courts during the trial period. ${ }^{6}$ These data identified all ADVO defendants eligible to participate in the trial, whether they were allocated to receive the treatment, and if so, whether they attended the WYP session and participated in the planning sessions. Data was originally recorded in individual spreadsheets and collated on request, but this was transitioned to a purpose-built website in mid-October 2017 (Nelson, 2018).

Records for 3,838 individuals were available in the WYP program dataset. Of these, 3,756 (97.9\%) were successfully matched to the BOCSAR Re-Offending Database (ROD) using the unique Criminal Names Index (CNI) as a person identifier. Four individuals were duplicated in the original WYP program data; 3 were allocated multiple times to WYP and one was allocated to both receive and not receive WYP. The individual allocated to both conditions was dropped from all analyses. For the other three cases, the first episode of WYP participation was considered the index event.

This leaves us with 3,751 individuals in our dataset; 1,833 individuals in the business-as-usual (BAU) condition and 1,918 allocated to receive WYP.

## Sample

The sample for this study includes all individuals identified by ACCSOs during the trial period (March 2017 - October 2019) as meeting the inclusion criteria for the trial, namely:

- non-incarcerated adult;
- identified as Aboriginal;
- issued an interim or final ADVO at a WYP court during the trial period.

For this analysis, each of the 3,751 rows in the data corresponds to a unique individual who participated in the trial. We have extracted finalisations up until April 2020, allowing time for breaches and offences to be finalised in court to avoid any differences in the offending environment during the COVID-19 pandemic. There is some attrition in the sample used to estimate treatment effects at the six- and twelvemonth marks because not all individuals had sufficient time after the program for these outcomes to be measured. We observe three-month outcomes for all individuals (1,833 in BAU and 1,918 in WYP), but we do not observe six-month outcomes for 36 individuals ( 17 in BAU, 19 in WYP) and twelve-month outcomes for 812 individuals (431 in BAU and 381 in WYP).?

[^6]
## Variables

## Outcome variables

The two pre-specified primary outcomes for the WYP program are:

1. Number of days between program entry (ADVO issue date) and first new breach ADVO: defined using the appearance date and the date on which the first breach occurred. If there was no breach offence, they were given the maximum number of days before the cut-off period; ${ }^{8}$
2. Number of days between program entry (ADVO issue date) and first new DV charge of any kind: defined using the difference between the appearance date and the offence date of the DV offence. If there was no DV related offence, they were given the maximum number of days before the cut-off period. ${ }^{9}$

We also estimate the impact of receiving the WYP program on two binary measures of these outcomes:

1. Whether they breached an ADVO: a binary variable defined by whether they were found guilty of breaching an Apprehended Domestic Violence Order; ${ }^{10}$
2. Whether they committed a DV offence: a binary variable defined by whether they were found guilty of any offence marked as DV related. ${ }^{11}$

All outcomes were analysed at three, six and twelve months after ADVO issue date.

## Independent variables

For this analysis, we use two treatment indicators to estimate the impact of the WYP program:

- Allocated: a binary variable defined by whether the individual entered the trial in a treatment week or a business-as-usual week;
- Received: a binary variable defined by whether the individual is recorded as receiving the intervention. As detailed on p.8, 1,088 of the 1,918 individuals allocated to receive WYP were offered the intervention (57\%), and 499 individuals were offered and accepted the WYP program ( $26 \%$ of those that were allocated to receive WYP).

We also include a range of defendant characteristics as controls in the analysis. All data items are drawn from the ROD database, except for "Region" which comes from ASU.

- Gender: a binary variable coded 0 for males and 1 for females.
- Region: a factor variable that can take the values Metro, NorthWest, Northern, Southern or Western, giving the location of the person's residence.
- Age: a continuous variable indicating the age of defendant at date of data extraction (i.e. 1/4/2020).
- Remoteness: A factor variable that can take the values Major cities, Inner regional, Outer regional, Remote, Very remote, indicating the Australian Bureau of Statistics (ABS) standard remoteness structure of the persons residence.
- Prior offending information:
- Whether the individual breached an ADVO order in the last five years (TRUE or FALSE);
- Whether the individual committed a DV related offence in the last five years (TRUE or FALSE);
- The number of proven offences in the last five years (positive integer, 0-20).

[^7]
## Empirical strategy

## Estimating the average impact of WYP on those who were offered the program ("intention-to-treat")

Eligible defendants were quasi-randomised into WYP, with randomisation being determined by the week the defendant was issued the ADVO. Each court alternated between WYP and "business-as-usual" (BAU) weeks. For example, defendants receiving a finalised ADVO order in one of the ACCSO courts during a specified week (e.g. October 2-6) were assigned to the WYP group and defendants issued an ADVO in the following week (e.g. October 9-13) were assigned to the control group. This means that whether the individual entered the trial in a WYP week (or not) is credibly unconfounded with respect to the outcome variables being measured. Treatment status was recorded by the ACCSOs directly to minimise any possibility of measurement error.

The unconfoundedness of the alternating week allocation for WYP is the foundation of the identification strategy for this evaluation. As we have full information on how entry into the WYP program was determined, we can rule out reverse causality and/or the presence of unobserved heterogeneity (such as selection into WYP by a less risky cohort).

Any potential threat to the identification strategy would be through a factor that is correlated with the alternating structure of our quasi-randomisation and that has a significant impact on breaches and reoffending. For example, one possible confound would be through the ACCSOs systematically selecting defendants of differing risk during the on and off weeks as the nature of the intervention meant that they could not be blinded to the treatment. We have no indication that this occurred during the trial (Nelson, 2018).

We believe that the most plausible threat to our identification strategy is spill-over through habit / persistence in the behaviour of the ACCSOs between weeks which would lead us to underestimate the impact of the intervention. As noted above, treatment status is recorded by the ACCSOs, leaving open the possibility that some participants received the intervention in 'business-as-usual' weeks or that some modified version of the MCII intervention was unintentionally adopted into standard practice. Based on discussions with the ASU, we do not believe this risk poses a significant threat to our analysis.

Finally, it is unlikely that there are any violations of the stable unit treatment value assumption that underlies our analysis. ${ }^{12}$ The individuals develop their own WYP plans, and outcomes are determined independently of other defendants in the vast majority of cases.

This means that we can estimate the average causal impact of being offered WYP on reoffending in our sample by simply comparing the average difference in the outcome(s) between those who entered the trial in a WYP week and those who entered the trial in the BAU week.

## Estimating the average impact of WYP on those who received the program ('treatment-on-treated')

We use an instrumental variable approach to estimate the impact of WYP on the offending rates of those who agreed to and received the intervention (approximately $35 \%$ of those offered WYP). ${ }^{13}$ For this analysis, our instrumental variable is simply whether the week the participant entered the trial was a treatment week since this determined entry into the program. Our treatment variable is whether the individual both agreed to and received the WYP program.

[^8]To be considered valid the instrument must satisfy four conditions.

1. Ignorability of the instrument: The quasi-randomisation ensures that the instrument is unconfounded with respect to both the treatment and the outcome. This is analogous to the argument given for the identification strategy for the 'intention-to-treat' estimate in the section above.
2. Exclusion restriction: Again, the quasi-randomisation ensures that the instrument can only impact the outcome through the take-up of the WYP program.
3. Monotonicity: We can safely rule out that our choice of instrument actually induced some people to be less likely to receive WYP, as the intervention was only offered in 'on' weeks.
4. Non-zero association between instrument and treatment variable: The F-statistic for the first stage regression (e.g. predicting who receives treatment using the instrumental variable) is 705 for our analysis. Using Staiger and Stock's (1997) rule of thumb that the F-stat of the model be greater than 10 , this first-stage model is clearly strong enough for this analysis.

The quasi-randomisation to treatment conditions means that we can be near certain that the instrument is unconfounded with respect to whether the individual received the WYP program and uncorrelated with factors influencing the outcome variable (other than through the effect on treatment).

## Statistical model

We estimate the impact of the WYP program using the following statistical model.

$$
y_{i}=\beta \cdot \text { treatment }_{i}+\gamma_{\mathrm{j}} \cdot \text { demographics }_{\mathrm{ij}}+\omega_{\mathrm{k}} \cdot \text { prior offending }_{\mathrm{ik}}
$$

where:

- treatment ${ }_{\mathrm{i}}$ is the treatment indicator;
- $\quad \beta$ is the estimated impact of the WYP program;
- $\gamma_{\mathrm{j}}$ is a vector of coefficients for the demographic variables included in the regression;
- $\omega_{\mathrm{k}}$ is a vector of coefficients for prior offending.

Definitions of all variables are provided in the variables section preceding this section.
We estimate two different measures of the treatment effect. First, we compare differences in each of the outcome measures between those who were assigned to the WYP program (regardless of whether they agreed to participate) and those who were not. This "intention-to-treat" estimate can be interpreted directly as the estimated average causal impact of the program on individuals when compared with BAU. We use logistic regression for the "any new" ADVO breach/DV offence outcomes and censored regression (tobit) for the days to first ADVO breach/DV offence outcomes.

Second, we estimate the impact of the WYP program on those who agreed to participate in the intervention using an instrumental variables approach (the "treatment-on-treated" estimate). ${ }^{14}$ Our "instrument" is whether the individual was allocated (or not) to the WYP program, while the treatment indicator is simply whether they received WYP after being allocated to do so. ${ }^{15}$ For the likelihood of the outcome occurring, we estimate an instrumental variables logit model, and for the days until the outcome occurs, we estimate an instrumental variables censored regression (tobit) model. ${ }^{16}$ The standard errors

[^9]are substantially larger for the instrumental variable estimates, which reflects the additional uncertainty in estimating the effect while accounting for possible self-selection into receiving the treatment. All reported standard errors are heteroskedacity consistent 'robust' errors.

We have restricted our estimates to aggregate effects, rather than present a series of sub-group analyses, because the program was designed to be uniformly delivered across demographic groups and evidence from the process evaluation suggested that WYP was generally implemented as intended across all courts. ${ }^{17}$ The analysis presented here has adhered as close as possible to the original pre-specified analysis plan as devised by BOCSAR, NSW BIU and ASU. ${ }^{18}$

## Descriptive statistics

Table 1 compares the demographic characteristics and prior criminal history of defendants allocated to a WYP treatment week during the trial period with defendants who attended court in the comparison (BAU) weeks.

Table 1. Characteristics of defendants allocated to the treatment and comparison weeks

| Characteristic | On week, $\mathrm{N}=1,918{ }^{1}$ | Off week, $\mathrm{N}=1,833^{1}$ | $p$-value ${ }^{2}$ |
| :---: | :---: | :---: | :---: |
| Median age | $33(26,42)$ | $32(26,42)$ | 0.018 |
| Unknown | 0 | 1 |  |
| Gender |  |  | 0.500 |
| Female | 559 (29\%) | 514 (28\%) |  |
| Male | 1,359 (71\%) | 1,319 (72\%) |  |
| Region |  |  | 0.004 |
| Metro | 355 (19\%) | 297 (16\%) |  |
| North/West | 342 (18\%) | 383 (21\%) |  |
| Northern | 248 (13\%) | 265 (14\%) |  |
| Southern | 341 (18\%) | 267 (15\%) |  |
| Western | 632 (33\%) | 620 (34\%) |  |
| Unknown | 0 | 1 |  |
| Remoteness |  |  | 0.130 |
| Major cities | 442 (34\%) | 388 (33\%) |  |
| Inner regional | 449 (35\%) | 423 (35\%) |  |
| Outer regional | 257 (20\%) | 219 (18\%) |  |
| Remote | 103 (8.0\%) | 130 (11\%) |  |
| Very remote | 36 (2.8\%) | 33 (2.8\%) |  |
| Unknown | 631 | 640 |  |
| Previous ADVO breach (within five years) | 287 (15\%) | 284 (15\%) | 0.700 |
| Previous DV offence (within five years) | 799 (42\%) | 737 (40\%) | 0.400 |

[^10][^11]Overall, the balance check provides evidence for the successful pseudo-randomisation to treatment using the alternating on/off week design. As shown in Table 1, this randomisation strategy resulted in groups that are similar on observables. We find a statistically significant difference for only two variables; the median age and the region where the individual resides. For the median age, the difference is less than one year and we do not believe that this difference is meaningful for this evaluation. For region, there are approximately $3 \%$ more participants in the WYP group from the Southern region than in the BAU group ( $18 \%$ vs $15 \%$ ), and $3 \%$ fewer participants are from the North/West region ( $18 \%$ vs $21 \%$ ). Given these differences are relatively small, we do not believe that they pose any issues for the analysis. Nevertheless, this variable has been included in all analyses to account for any confounding caused by this imbalance.

## RESULTS

We estimate the causal impact on breaches of ADVOs and DV related offending, using two measures of each offence:

1. Whether they commit the offence within the observation period;
2. The number of days until the offence occurred (if ever).

For both these outcome measures, we consider three observation periods (three, six and twelve months after the individual is identified by the ACCSO and allocated to either receive WYP or receive BAU) and two estimates of impact (outcome for those allocated to receive WYP and those who actually received WYP). This means that for each offence, we present 12 estimates (2 measures $\times 3$ observation periods $\times 2$ estimates of the outcomes) next to the average outcome in the BAU group. The main results of the analysis are presented below. Full regression tables are provided in the Appendix.

Each of the figures below visualises the level of the outcome (either the proportion or average days) for the business-as-usual cohort, along with level of the outcome implied by our regression model for each of our two estimates (Allocated WYP and Received WYP). This means that the level of each estimate can be straightforwardly interpreted as the predicted outcome for the business-as-usual group had they been allocated to or received WYP respectively. ${ }^{19}$

## Breach of Apprehended Domestic Violence Orders

First, we estimate the causal impact of the WYP program on ADVO breaches. As described above, we present the average estimated outcome by treatment status across multiple observation periods. Across all measures, we find no evidence that the WYP program caused a meaningful difference in if or when the individual breached their ADVO.

## Whether a breach occurred (measured at three, six and twelve months)

Figure 3 shows only small differences in the proportion of defendants that breached their ADVO across treatment status and observation period. Looking at the three-month observation period, we see that the same proportion of defendants allocated to receive WYP breached their ADVO (5.6\%) compared with BAU (5.6\%). A slightly higher proportion of those that received WYP breached their ADVO (6.1\%) compared with BAU, but this difference was not statistically significant at conventional levels. ${ }^{20}$

[^12]Turning to the six-month and twelve-month observation periods, we see larger differences in breach rates by treatment status but the direction of the difference is not consistent across observation periods and no differences are statistically significant at conventional levels. At six months, 0.6 p.p. more defendants who were allocated to WYP breached their ADVO compared with defendants allocated to BAU, a difference that increases to 3 p.p. when considering just those who received WYP. However, at twelve months, 1.1 p.p. fewer defendants allocated to WYP breached their ADVO compared with defendants allocated to BAU, and 3.5 p.p. fewer defendants receiving WYP breached their ADVO.

This analysis provides no evidence that the WYP program had a causal impact on the likelihood of a defendant breaching their ADVO. The direction of the estimates is inconsistent between observation periods, and the small differences observed are within the variation we would expect.

Figure 3. Proportion of defendants that breached their ADVO, by treatment status and observation period

Days until a breach occurred, if ever (measured at three, six and twelve months)
Figure 4 shows the average number of days until first ADVO breach occurred (if ever), by treatment status and observation period. This measure allows us to understand whether WYP has been effective in delaying breaches. The results displayed in Figure 3 are consistent with the results shown above.

Figure 4. Average days until the defendant breached their ADVO (if ever), by treatment status and observation period

Looking at the three and six-month observation periods, we see small differences by treatment status in the average number of days until an ADVO breach occurs. At three months, there is a difference of 3 and 12 days, respectively, for those allocated and those that received WYP compared with those in the BAU condition. At six months, there is a difference of 1 and 6 days, respectively, for those allocated and those that received WYP compared with the BAU condition. These differences are too small for us to have any certainty that they can be attributed to the WYP program.

At the twelve-month mark, the difference between the groups is much larger, both proportionally and in absolute magnitude. For those who received WYP, breaches occurred on average 28 days later than for those in the BAU condition. However, there are wide confidence intervals associated with this IV point estimate of the treatment effect (the treatment-on-treated estimate) and the difference is not statistically significant at conventional thresholds.

## Domestic Violence related offending

Next, we estimate the causal impact of the WYP program on the likelihood of any DV related offence. Analogous to the analysis of ADVO breaches, we measured this outcome in two ways: (1) the probability that a DV related offence occurred at any time during the observation period, and; (2) the number of days until a DV related offence occurred (if ever).

## Whether a DV related offence occurred (measured at three, six and twelve months)

Figure 5 shows the proportion of defendants who committed a DV related offence, by treatment status and observation period. We see a similar pattern of results across the observation periods as was found for ADVO breaches. The proportion of defendants who committed a DV related offence within three months of entering the trial was the same for those allocated to WYP and those allocated to BAU, with 6.8\% of defendants in both groups committing a DV related offence during this period.

Figure 5. Proportion of defendants that committed a DV related offence, by treatment status and observation period

At the six-month observation period, we again observe higher rates of DV related offending for those allocated to and those that received WYP (1.1 p.p. and 4.9 p.p. respectively) when compared to the BAU condition, but these differences are not statistically significant. Over the twelve-month observation period, we see that both the allocated and received WYP groups had a lower proportion of defendants who committed a DV related offence ( 0.9 p.p. and 2.1 p.p. respectively) compared with BAU, but again these differences are not statistically significant.

This analysis provides no evidence that the WYP program had a causal impact on the likelihood of a defendant committing a DV related offence. The small differences between groups and the inconsistent direction of the treatment effect suggests that the WYP program was not sufficient to cause a meaningful change in DV related offending.

Days until a DV related offence occurred, if ever (measured at three, six and twelve months)
Figure 6 shows the average number of days until a DV related offence occurred (if any), by treatment status and observation period. Consistent with the analysis of days until any ADVO breach, we see very small differences between defendants receiving BAU and those that were allocated to or received WYP at the three-month mark ( 1 day and 5 days, respectively) and the six-month mark (3 days and 10 days respectively); and none of these differences are statistically significant. The differences between these groups are substantially larger when measured at 12 months follow-up (8 days for those allocated to WYP and 32 days for those that received WYP) but are not statistically significant at conventional levels.

Figure 6. Average number of days until the defendant committed a DV related offence (if ever), by treatment status and observation period

This analysis does not provide any evidence that the WYP program had a causal impact on DV related offending behaviour. In line with the previous results, the differences between groups are small and we cannot confidently attribute them to the WYP program.

## DISCUSSION

This study estimates the causal impact of the WYP program on breaches and DV related offending amongst Aboriginal defendants issued an ADVO in NSW. Defendants were quasi-randomised to the brief intervention using an "on week/off week" research design. Outcomes for those who were allocated to receive WYP were compared with outcomes for those that were not allocated and did not receive WYP. ADVO breaches and proven DV offences were measured at three, six and twelve months after delivery of WYP. Comparing both the likelihood and time to first new offence/breach, we found no meaningful differences between defendants allocated to receive the program and defendants allocated to the BAU condition for any of the outcomes measured. Restricting the analysis to those who were offered and accepted the WYP program similarly found little evidence for an effect of WYP on ADVO breaches or DV offences.

The aim of the WYP program was to improve compliance with ADVOs through the use of mental contrasting and implementation intention techniques to help close the gap between a defendant's intention to comply with their ADVO and their actions. There are four possible explanations for the small differences observed between those that received the intervention and those that did not:

1. The intervention was not successful in closing the 'intention-action' gap;
2. Closing the 'intention-action' gap was not sufficient to change breach or domestic violence behaviour;
3. Recorded breach and domestic violence offences are not a sufficiently sensitive measure to detect the change in behaviour;
4. Failure of implementation and/or randomisation.

From the data we have available it is difficult to assess the relative importance of each of these explanations for the results reported here. The study provides evidence that the delivery of WYP was not sufficient to induce large changes in the criminal justice outcomes examined, but this does not necessarily imply that the MCII intervention was not successful in closing the intention-action gap (i.e. the intended mechanism of action). Additional self-reported data on compliance with the if-then plans developed by the defendants during the trial would be needed to assess whether this shorter-term goal was achieved.

In any case, even if WYP was successful in closing the intention-action gap, it is possible that the brief 10-minute intervention was not sufficient for most individuals to avoid breaching their ADVO or committing further DV related offences. The drivers of domestic violence are complex, with financial stress, personal stress, substance abuse, lack of social support and trauma being just a few of the interconnected factors that drive offending behaviour (DeMaris, Benson, Fox, Hill \& Van Wyk, 2003; Lauritsen \& Schaum, 2004; Yakubovich et al., 2018). There is weak evidence for the effectiveness of any perpetrator interventions for domestic violence (Akoensi, 2013; Eckhart et al., 2013), suggesting that this is a particularly difficult behaviour to shift. Brief interventions, such as WYP, may need to be combined with more intensive behavioural change programs and/or long-term social support to have any impact on rates of DV offending.

Another limitation of our study is its reliance on administrative data to assess program effectiveness. It is well established that DV is significantly undercounted in criminal justice administrative data. Only about one-half (51.8\%) of all DV offences are reported to police and many of these do not proceed to the conviction stage (the threshold for inclusion here) (Birdsey \& Snowball, 2013). It is possible that the WYP program resulted in small changes in perpetrator behaviour and victim safety but the outcome measure used was not sensitive enough to detect these incremental improvements. ${ }^{21}$ Inclusion of self-report data

[^13]from victims and defendants would have significantly enhanced the current evaluation. Self-report data would not only have improved the accuracy of our outcome measures but could also have been used to explore defendants' satisfaction with the intervention, whether WYP changed their interaction with the ACCSOs or improved their broader experience with the justice system, and the extent to WYP helped them to reframe ADVO compliance.

The validity of our estimates also depends on the quasi-randomisation implemented by the ACCSOs for the WYP evaluation. For example, it is possible that there were "spill-over effects", through ACCSOs becoming upskilled and/or compensating in "off weeks" to deliver equivalent support, which would lead us to understate the benefit of the WYP approach. ${ }^{22}$ While there were a small number of issues identified in the process evaluation (e.g. few ACCSOs had experience delivering a program like WYP, lengthy delays between initial training and completing WYP sessions), the implementation of WYP was largely considered to be a success (Nelson, 2018). This is especially impressive given the burden the evaluation design placed on the ASU workforce, and the diversity and varying levels of experience and expertise of the ACCSOs (Nelson, 2018).

The successful implementation of WYP, and the NSW Department of Communities and Justice Aboriginal Services Unit's commitment to rigorous evaluation, has also generated a wealth of valuable experience, data and materials for both ACCSOs and policy makers. For example, the plans that have been collected as part of the WYP program could be analysed and used to compare the anticipated causes of breaches with the eventual reasons for a breach occurring (if any). Further research with defendants who have gone on to commit a breach would assist in identifying how interventions and resources could be better targeted to prevent a breach from occurring in similar scenarios.

Given the successful implementation of WYP and the enhanced capabilities of the ASU workforce evidenced by the implementation of the trial, consideration could be given to trialling a more intensive ACCSO delivered intervention or a set of interventions to assess whether enhancements to the current model would be sufficient to shift outcomes. Any future reforms should continue to incorporate two critical elements that were successful elements of the 'What's Your Plan' program: (1) an extensive development and co-design process with Aboriginal staff and; (2) the establishment of a robust evaluation methodology ahead of program implementation to test whether stated objectives are achieved.

## ACKNOWLEDGEMENTS

Thanks to Edwina Crawford, Jeremy Smith and Penelope Josey from the NSW DCJ Aboriginal Services Unit for implementing and providing critical feedback throughout the process, Eva Koromilas and the NSW Behavioural Insights Unit team for their work on the design and implementation of the intervention, Paul Nelson for his wonderful process evaluation and helpful guidance throughout the writing of this report, Alana Cook for providing data incredibly promptly, and Suzanne Poynton, Clare Ringland and Ilya Klauzner for their help bringing the data for the report and the structure of the evaluation together.

## NSW Recorded Crime Statistics December 2017 to June 2023

M onthly count of distinct POIs where an ADVO breach incident was recorded.
and an ADVO compliance check for the same POI occurred on the same day.
By Police Region and PAC/ PD.
Not for public release. This table contains preliminary data and is for internal use only.

# The impact of the 'What's Your Plan?' program on ADVO breaches and domestic violence 

## Min-Taec Kim

## SUMMARY

## BACKGROUND

The aim of this study is to understand the impact of the 'What's Your Plan' (WYP) program on breaches of Apprehended Domestic Violence Orders (ADVOs) and Domestic Violence (DV) related offending.

WYP asked defendants to imagine the future with and without breaching their ADVO, and to identify and plan for potential obstacles to compliance. WYP was an application of a behaviour change intervention ('Mental Contrasting and Implementation Intentions') from the psychology literature.

WYP was available to Aboriginal defendants with a finalised ADVO between March 2017 and October 2019, and implemented with an on-week, off-week structure to facilitate evaluation.

We compare outcomes for people in the 'offweeks' (Business-As-Usual) with both people in the 'on-weeks', and those that actually received the WYP program ( $26 \%$ of those allocated).

For both breaches and DV related offending, we looked at the proportion of people who committed the offence, and the number of days until the offence occurred (if ever), within 3,6 and 12 months.

## KEYWORDS

Domestic violence
Program evaluation
Apprehended violence order (AVO)
Behavioural insights
Recividism / Re-offending
Aboriginal over-representation

## KEY FINDINGS

We find no evidence for any impact of the 'What's Your Plan' program on breaches of ADVOs or DV-related charges.

There were small differences in offending between those allocated to WYP and those that were not, but offending rates were sometimes higher for those allocated to WYP. These differences were larger when looking at the impact on those that actually received the WYP program. None of these differences were statistically significant at conventional levels.

Reoffending outcomes for participants in the WYP and comparison group (BAU)

Note that error bars indicate 95\% confidence intervals

## CONCLUSION

We find no evidence that the 'What's Your Plan' program is sufficient to reduce DV-related offending for Aboriginal defendants. This suggests that a program like WYP may depend on the availability of other programs, support and resources to be effective.

## NSW Apprehended Violence Orders July 2021 to June 2023

Table 1. Count of enforceable Apprehended Violence Order episodes for defendants in each three month period, number and percentage of enforceable orders breached within the quarter or breached ever, by type of order, age group, gender and for Aboriginal defendants
Not for public release. This table contains preliminary data and is for internal use only.

| Type of AVO | Defendant group |  | 3 months ending 2021Q3 | 3 months ending 2021 Q4 | 3 months ending 2022Q1 | 3 months ending 2022Q2 |

## Counting rules:

AVO episode: period of AVO enforcement from commencement of provisional order to expiry of order or revocation of order Enforceable orders were active at the start of the quarter, commencing before or on the quarter start date and not ending before the quarter start date Enforceable order breached in quarter: Enforceable orders with a breach of order between the quarter start date and quarter end date
Enforceable order breached ever: Enforceable orders with a breach of order before or on the quarter end date
Breach rate quarter: \% Enforceable orders breached within the quarter
Breached rate ever: \% Enforceable orders breached ever
Adult/Juvenile: Age group at time of episode commencement. Total includes where age unknown.

## Counting rules:

AVO episode: period of AVO enforcement from commencement of provisional order to expiry of order or revocation of order
Enforceable orders were active at the start of the quarter, commencing before or on the quarter start date and not ending before the quarter start date
Enforceable order breached in quarter: Enforceable orders with a breach of order between the quarter start date and quarter end date
Enforceable order breached ever: Enforceable orders with a breach of order before or on the quarter end date
Breach rate quarter: \% Enforceable orders breached within the quarter
Breach rate ever: \% Enforceable orders breached ever
LGA: LGA of defendant at episode commencement

|  |  | 6 to <9 | 299 | 430 |
|  |  | 9 to <12 | 278 | 378 |

| 12 to $<15$ | 186 | 258 |
| :--- | ---: | ---: |
| 15 to $<18$ | 113 | 171 |
| 18 to $<21$ | 103 | 144 |
| 21 to $<=24$ | 102 | 131 |
| Total breached within 24 months | 2,860 | 3,978 |
| Total orders in force for at least 24 months | 8,054 | 11,261 |
| $\%$ of orders in force for at least 24 months breached | 35.5 | 35.3 |

## Counting rules:

AVO episode: period of AVO enforcement from commencement of provisional order to expiry of order or revocation of order
AVO issued date: the episode_start_date for each episode_ID
AVOs in force for at least 12 months: episode start date is at least 12 months before the episode end date +1
AVOs in force for at least 24 months: episode_start_date is at least 24 months before the episode_end_date +1
Breach in month 1: the first AVO breach occurred within the first month of the episode start date,
Breach in month 2: the first AVO breach occurred in the second month since the episode start date etc.

JACKIE FITZGERALD
EXECUTIVE DIRECTOR

# MEDIA RELEASE <br> Evaluation of Aboriginal Domestic Violence program What's Your Plan" 

Release Date: 10:30am, Thursday 7 October 2021
An innovative NSW program delivered to Aboriginal people receiving an Apprehended Domestic Violence Order does not appear to reduce the risk of DV reoffending according to an evaluation completed by the Bureau of Crime Statistics and Research (BOCSAR).

What's Your Plan was a behaviour change program designed to increase ADVO compliance. The program was available to Aboriginal defendants with a finalised ADVO between March 2017 and October 2019.

The program applied two self-regulatory behaviour change strategies which have an evidence base in the psychology literature: Mental Contrasting and Implementation Intentions. Participants were asked to imagine the future with and without breaching their ADVO, and to identify and plan for potential obstacles to compliance.

What's Your Plan was delivered in court by trained Aboriginal Client and Community Support Officers and reinforced with a follow-up call and SMS reminders. The program was implemented with an on-week, off-week structure allowing a quasi-randomised outcome evaluation design.

The evaluation considered the impact of the program on both ADVO breaches and proven DV charges. For both measures, the evaluation considered the proportion of reoffenders, and the number of days until the offence occurred (if ever), within 3, 6 and 12 months.

Outcomes for people in the 'off-weeks' (the control group) were compared with both people in the 'on-weeks', and those that actually received the WYP program (26\% of those allocated).

The evaluation found no evidence for any impact of the 'What's Your Plan' program on breaches of ADVOs or DV-related charges.

Commenting on the findings, the Executive Director of BOCSAR, Jackie Fitzgerald, said that the negative finding might be because domestic violence is notoriously difficult to influence through perpetrator interventions.
"The drivers of domestic violence are complex. Brief interventions, such as What's Your Plan, may need to be combined with more intensive behavioural change programs and/or long-term social support to have any impact on rates of DV offending."

| Marriage | the union of two people to the exclusion of all others, voluntarily entered into for life, <br> as outlined in section 5 of the Marriage Act 1961 (Cth) |
| Marriage Act | Marriage Act 1961 (Cth) |
| MS Act | Modern Slavery Act 2018 (NSW) |
| NSWPF | NSW Police Force |
| STPP | Support for Trafficked People Program |

## Consultation questions

## Applications for AVOs

1. Is the obligation to apply for a provisional AVO in the context of forced marriage appropriate, sufficiently clear and consistently complied with?
2. Are there any other circumstances in which the making of an AVO should be mandated in matters involving forced marriage?

## Applications for AVOs and standing

3. Should section 48 of the CDPV Act be amended to give additional people or entities standing to apply for AVOs in situations of forced marriage? If so, who else should have standing?
4. Are there any risks if additional people or entities have standing to apply for AVOs in situations of forced marriage? If so, what are these risks? Are there ways to mitigate against these risks?

## Grounds for making an AVO

5. Do the grounds for making an ADVO effectively recognise and respond to circumstances of forced marriage? Could these grounds be further strengthened for this purpose and, if so, how?
6. Under what circumstances will individuals involved in facilitating a forced marriage not be in a domestic relationship with the victim-survivor? Do the grounds for making an APVO effectively protect victim-survivors in these cases? If not, how could these grounds better respond to the needs and circumstances of victim-survivors of forced marriage?

## Prohibitions or restrictions under AVOs

7. Are the existing prohibitions and restrictions that may be imposed under an AVO adequate and effective to safeguard against forced marriage? Are any changes needed to the prescribed form?
8. Should provisional AVOs be able to prohibit behaviour of the defendant that might coerce, threaten or deceive the protected person to enter into a forced marriage, as court-ordered AVOs have the power to do?

## Practice and procedure for AVOs

9. Are there any practice changes that could be made to better support victim-survivors of forced marriage to have access to the protections under AVOs? If so, what are they?
10. Is additional guidance necessary or helpful to assist victim-survivors and support services to make use of AVOs in cases of forced marriage? If so, what should this guidance consist of?
11. Are there additional barriers for specific cohorts of the community in obtaining protections against forced marriage under the AVO system?

## Forced marriage offences

12. Are the existing criminal offences under NSW legislation adequate and appropriate as criminal justice responses to forced marriage (also noting the Commonwealth forced marriage offences)?

## Introduction

A forced marriage takes place when a person is married without that person's free and full consent. The person may be coerced, threatened or deceived into marrying or may not have the capacity to give consent. There is growing awareness of forced marriage as a form of modern slavery and an act of domestic and family violence. It is not limited to a problem that happens overseas: it can happen, and is happening, within Australia. The Australian Federal Police (AFP) received 79 reports of forced marriage Australia-wide in 2020-2021 and 84 reports in 2021-2022. ${ }^{1}$ Globally, in 2021, there was an estimated 22 million people living in situations of forced marriage, with over two-thirds being female. ${ }^{2}$

The Department of Communities and Justice (the Department) is undertaking a review into the legal protections for victim-survivors of forced marriage in NSW. This review seeks to assess the adequacy of existing legal protections in NSW to determine whether any further protections are necessary. The purpose of this discussion paper is to invite feedback from stakeholders about the operation of these existing legal protections in order to generate discussion about any need for reform.

This review focuses on the legal protections for victim-survivors in NSW. In doing so, it is acknowledged that responding to incidents of forced marriage is complex and requires not only a legal response but also the co-ordinated delivery of social supports at both Commonwealth and NSW levels. Currently, the Commonwealth Government runs the Support for Trafficked People Program (STPP), which provides accommodation, financial support, counselling and legal and immigration advice to victim-survivors of forced marriage. ${ }^{3}$ NSW provides support through the Legal Aid NSW Early Intervention Unit (EIU) and Domestic Violence Unit (DVU), which offer advice and legal assistance to victim-survivors and, in some instances, legal representation. Supports may also be available through Victims Services NSW. A summary of available support services is provided at Appendix A.

## Background to this review

This review follows the enactment of the Modern Slavery Act 2018 (NSW) (the MS Act) and the subsequent Parliamentary inquiry into the MS Act, conducted shortly after its introduction.
In 2018, NSW Parliament passed the MS Act, which aimed to prevent modern slavery practices and provide support and assistance to victim-survivors of modern slavery, including those of forced marriage.

The MS Act did not immediately commence after it was passed. Rather, in 2019, the NSW Legislative Council Standing Committee on Social Issues (the Committee) undertook an inquiry into the Act to consider, among other things, its operability and its interaction with Commonwealth law. ${ }^{4}$

The Committee handed down its report on 25 March 2020. In relation to the issue of forced marriage, the Committee recommended, at Recommendation 17, that the NSW Government establish a working group to develop further amendments to the Crimes (Domestic and Personal Violence) Act 2007 (NSW) (the CDPV Act) to protect victim-survivors. ${ }^{5}$

The NSW Government Response to the Committee's inquiry supported Recommendation 17 in principle. The Response noted that the Department of Communities and Justice was undertaking a review to consider whether further legislative protections for victims-survivors of forced marriage were necessary under NSW law, in particular under the apprehended violence order (AVO) regime. The Response noted that this review was to be informed by consideration of the Standing Committee's report and would include consultation with key stakeholders. ${ }^{6}$

Following release of the Committee's final report, the Modern Slavery Amendment Act 2021 (NSW) was passed on 29 November 2021. It amended the MS Act. In respect of forced marriage, it created a new criminal offence of child forced marriage under section 93AC of the Crimes Act 1900 (NSW) (the Crimes OFFICIAL

Act). It also introduced changes to the CDPV Act, which were aimed at better protecting victim-survivors of forced marriage through the AVO framework. For example, it expressly referred to the NSW and Commonwealth criminal offences involving forced marriage as personal violence offences, which, when someone fears the commission of such an offence, can be a ground for making an AVO. The MS Act, as amended by the Modern Slavery Amendment Act 2021, commenced on 1 January 2022.

Work on the Department's review of forced marriage was suspended while the amendments to the MS Act were considered and enacted. This Discussion Paper considers these further developments now that they have been in operation for over a year to ensure that the review is able to address all relevant matters.

## Scope of this review

The scope of this review is informed by the recommendations of the Committee's 2020 final report, particularly Recommendation 17, and the NSW Government's Response to the Committee's report. It follows that this review is limited to a consideration of the protections for victim-survivors under key NSW laws and any need for reform to those laws. It has a particular focus on the protections that are available under the AVO regime in the CDPV Act. It takes account of the changes to the AVO regime introduced by the MS Act and considers whether these changes go far enough in protecting victim-survivors in NSW. The review also considers the offence against child forced marriage under the Crimes Act.

It is acknowledged that there are other relevant laws that are beyond the scope of this review but that nevertheless have an impact on the protections available to victim-survivors in NSW. The NSW child protection framework established under the Children and Young Persons (Care and Protection) Act 1998 (NSW) (the Care Act) plays an important role in responding to child victim-survivors of forced marriage. However, the Care Act is outside the scope of the current review.

Similarly, there are Commonwealth laws that provide some protection to victim-survivors. These laws are referred to in the ensuing discussion but are outside the scope of this review for the purpose of proposing any possible reforms. Although this review solely focuses on NSW legislation, we will share any relevant findings with the Commonwealth for their consideration.

Lastly, as stated in the Introduction above, while this review acknowledges the importance of non-legal supports and services in protecting victim-survivors, it is outside its scope to consider any proposals in respect of the operation of those services.

## Terminology

This discussion paper adopts the word 'victim-survivor' throughout. This is used as an inclusive term to describe both people who have been subjected to forced marriage as well as people who may be at risk of forced marriage.

## Vulnerable cohorts and forced marriage

It is acknowledged that different members and groups within the NSW community may be disproportionally affected by the issue of forced marriage. Experiences in relation to forced marriage may be unique for women, children and young people, people from culturally and linguistically diverse backgrounds and LGBTIQ+ communities. These experiences can also be shaped by intersectional identities.

In responding to the consultation questions set out in this discussion paper, the Department invites feedback on the experiences of forced marriage for vulnerable and marginalised cohorts as well as any measures that could be put in place to strengthen protections for these victim-survivors.

## Responding to this discussion paper

As part of this review, the Department is conducting public consultation, alongside additional targeted consultation with key government and non-government stakeholders. Responding to this discussion paper is the key mechanism through which stakeholders can provide their input and expertise to inform the review.

The discussion paper outlines the current legal protections against forced marriage available in NSW and seeks to explore the adequacy of those protections as they apply to adult and child victim-survivors of forced marriage.

Following stakeholder feedback, a report and recommendations will be provided to the Attorney General for consideration.

The Department welcomes feedback on any or all of the questions presented in this paper. You can provide feedback by providing a written submission and sending it to domesticviolencepolicy@justice.nsw.gov.au. Alternatively, you can choose to complete the submission form on the Have Your Say website, which you can access here:
https://www.haveyoursay.nsw.gov.au/reviewing-forced-marriage-legal-protections. If you wish to include case studies to highlight the views and experiences of clients, they should be de-identified to protect the privacy of those individuals.

Please provide your written submission or completed submission form by close of business on 1 December 2023.

The Department may identify or reproduce any part of submissions in its report. If you wish for your submission to be treated confidentially, please advise at the time of providing your submission.

## Current legal responses to forced marriage in NSW

NSW legislation responds to the issue of forced marriage in the following ways:

- By providing for civil protections under the AVO framework of the CDPV Act
- By providing for a criminal offence of child forced marriage under section 93AC of the Crimes Act.

Other criminal offences in NSW may also apply in circumstances of forced marriage. Commonwealth legislation also deals with the issue of forced marriage, predominantly through the criminal law and, to a limited extent, family law.

## Civil protections against forced marriage in NSW

Civil protections are available under Commonwealth and NSW laws to respond to incidents of forced marriage.

At the Commonwealth level, the Family Law Act 1975 (Cth) provides some protections for children at risk of being taken overseas for the purposes of entering into a forced marriage. The Australian Federal Police (AFP) maintains the Family Law Watch List (Watch List), which is designed to alert police to the movement of children. People under 18 years of age can be placed on the Watch List under a Federal Circuit and Family Court of Australia (FCFCA) order or by way of a filed application for an FCFCA order. This list can be used to prevent a child or young person from being taken out of Australia for the purposes of entering into a forced marriage. Once a person turns 18 years old, there are no Commonwealth-based civil protections available. ${ }^{7}$

In NSW, AVOs are the primary civil protection order that may apply to situations of forced marriage. These orders prohibit or restrict the subject of the order ('the defendant') from engaging in certain behaviours where victim-survivors have reasonable grounds to fear and in fact fear for their safety and/or welfare.

The Care Act also provides authority to the Department to act to protect children who are at risk of significant harm, including at risk from forced marriage (see Appendix C for more information).

## Apprehended Violence Orders (AVOs)

AVOs are important tools in responding to circumstances relating to domestic and family violence and personal violence. The CDPV Act provides for two types of AVOs in NSW: Apprehended Domestic Violence Orders (ADVOs) and Apprehended Personal Violence Orders (APVOs). An ADVO operates to protect a person who is or has been in a domestic relationship and an APVO operates to protect a person where no domestic relationship exists.
An AVO is a civil order made by a court. It may be made independently and in the absence of any criminal proceedings. An AVO may be applied for to protect a person's safety and welfare. While an AVO itself is a civil order, breaching an AVO is a criminal offence. In the 12 months to September 2022, the number of final ADVOs made in NSW was 37,395 and the number of final APVOs made was $4,932 .{ }^{8}$

An AVO can be made as a provisional or interim order or as a final order. Interim and final AVOs can only be made by a court. A provisional AVO can be made by the NSW Police Force (NSWPF). A provisional AVO is taken to be an application by the applicant officer to the court for determination. The defendant on a provisional AVO should be brought before a court on the next AVO list day or, at the latest, 28 days after the making of the provisional order. ${ }^{9}$

Where it is suspected that a forced marriage has taken place, or may take place in the future, an AVO can be made to provide certain protections to victim-survivors. For example, an AVO may place restrictions on the behaviour of an individual trying to coerce someone into marriage, such as prohibiting that individual from threatening or intimidating the other person or from having any contact with that person.

## Applications for an AVO

## Circumstances requiring an application for a provisional AVO

A provisional AVO is an AVO applied for by an investigating officer and made by a police officer or an authorised officer, ${ }^{10}$ such as a registrar. There are circumstances in which the NSWPF is legally required to apply for a provisional AVO, including in circumstances relating to forced marriage.

The NSWPF is obliged to apply for a provisional AVO on behalf of a victim-survivor if:

- First, the investigating police officer believes or suspects that a specified offence has been committed or is likely to be committed or is imminent or that proceedings for such an offence have been commenced. These specified offences include:
- a domestic violence offence. This includes NSW and Commonwealth forced marriage offences and the NSW child forced marriage offence.
- a stalking and intimidation offence, noting that intimidation is defined under section 7 of the CDPV Act to include conduct amounting to the coercion or deception of, or a threat to, a person to enter into a forced marriage whether there is a domestic relationship or not; - an offence of child or young person abuse (Care Act section 227), and
- Secondly, the investigating police officer has good reason to believe that an order needs to be made immediately to ensure the safety and protection of the person who would be protected by the order or to prevent substantial damage to any property of that person.
Where a report of child forced marriage is raised with the NSWPF, or a report is made to the Child Protection Helpline, the NSWPF is notified about the matter and investigates whether or not an offence has been committed. In such cases, the NSWPF is notified regardless of the final child protection response. Under section $27(1)$ (a)(ii) of the CDPV Act, the NSWPF is obliged to apply for a provisional AVO for the child in need of protection if they believe or suspect that an offence involving child or young person abuse has been or is being committed or is imminent or likely to be committed, and the police officer has good reason to believe an order needs to be made immediately to ensure the safety and protection of the person who would be protected by the order. The NSWPF must also contact the AFP as part of existing information-sharing arrangements. NSW child protection agencies seek updates from the NSWPF and AFP to continue to assess the risk to the child or young person.

## Circumstances mandating the making of AVOs

## Interim AVOs on charge of a serious offence

Section 40 of the CDPV Act requires the Court to make an interim AVO against a person who is charged with a serious offence, whether or not the NSWPF or other party applied for an AVO, unless the court considers that it is not required. A serious offence is defined in section 40(5) of the CDPV Act to include,
relevantly, a domestic violence offence, a stalking and intimidation offence and the NSW and Commonwealth forced marriage offences.

## Final AVOs on conviction of a serious offence

Similarly, under section 39 of the CDPV Act, if a person pleads guilty or is found guilty of a serious offence, the court must make a final AVO against the person for the protection of the victim-survivor, whether or not the NSWPF or another party applies for an AVO, unless the court considers that it is not required. The term, "serious offence", has the same meaning as in section 40, and therefore includes the NSW and Commonwealth forced marriage offences.

## Consultation Questions

1. Is the obligation to apply for a provisional AVO in the context of forced marriage appropriate, sufficiently clear and consistently complied with?
2. Are there any other circumstances in which the making of an AVO should be mandated in matters involving forced marriage?

## Applications for AVOs and standing

Victim-survivors of forced marriage may face barriers in seeking the protections provided by the AVO regime.

Section 48(2) of the CDPV Act gives standing to apply for a final or an interim AVO to:

- the person in need of protection;
- a guardian of a person in need of protection, if the person is subject to a guardianship order; or
- a police officer.

However, only a police officer has standing to apply for an AVO if each of the protected persons under the order is a child.

In cases of a child being coerced to enter a forced marriage, both the Department and the NSWPF have standing to apply for a final or interim AVO according to section 48(2)(c) of the CDPV Act.

While individuals can make private applications to the court for AVOs, it can be extremely challenging for a victim-survivor of forced marriage to make a private application for an AVO against a family member, member of their kinship circle, a family friend or community member. As noted in submissions to the Inquiry, ${ }^{11}$ victim-survivors may want the behaviour surrounding forced marriage to stop but not want to implicate a person/s with whom they have familial or personal affiliation in a crime, to jeopardise temporary immigration status or to be alienated from their family or social networks.
Noting these barriers, stakeholder submissions to the Inquiry argued that pressure on victim-survivors to make applications for AVOs needs to be reduced. Some called for an expansion of the people eligible to make an AVO application on behalf of a victim-survivor. ${ }^{12}$ For example, currently the AFP manages the vast majority of criminal prosecutions of forced marriage cases. However, we understand that the AFP does not have standing under the CDPV Act to apply for an AVO on behalf of a victim-survivor because a "police officer" is defined as a member of the NSWPF. ${ }^{13}$ Stakeholder submissions to the Committee also suggested other categories of persons that could be eligible to make an AVO application on behalf of victim-survivors such as carers, protective family members, organisations or friends. ${ }^{14}$

Expanding the eligibility of those who can apply for an AVO may have unforeseen consequences and should be considered carefully. Expanding the list of those who can apply for an AVO may make it difficult for a court to determine which parties are acting in the true interests of a victim-survivor in applying for an order. Consideration needs to be given to the risk of undesirable consequences, such as systems abuse. Systems abuse is the abuse of official processes by a perpetrator to exert their power and control over a victim-survivor.

There may be other existing and possible mechanisms to achieve the policy objective of providing victimsurvivors with AVO protections without expanding the range of possible AVO applicants. For example, NSW child protection services and NSWPF already work very closely in matters of child protection, including child forced marriage. As part of child protection responses, the NSWPF can and do apply for AVOs on behalf of the Department even though, in principle, the Department also has standing to apply directly for an AVO. The Department makes a request to NSWPF for an AVO. Additionally, the NSWPF and AFP work together to progress both Commonwealth and NSW-based responses to cases of forced marriage.

## Consultation Questions

3. Should section 48 of the CDPV Act be amended to give additional people or entities standing to apply for AVOs in situations of forced marriage? If so, who else should have standing?
4. Are there any risks if additional people or entities have standing to apply for AVOs in situations of forced marriage? If so, what are these risks? Are there ways to mitigate against these risks?

## Grounds for making an ADVO

Section 16 of the CDPV Act outlines the grounds on which a court can make an ADVO.
For an ADVO to be made, an application must be made to the court and the court needs to be satisfied that, on the balance of probabilities, a person who has or has had a domestic relationship with another person has reasonable grounds to fear that:

- the defendant will commit a domestic violence offence against them; or
- the defendant will engage in conduct in which they intimidate the person (which includes conduct amounting to coercion of a person to enter into a forced marriage) or someone the person has a domestic relationship with, or stalks the person;
being conduct that, in the opinion of the court, is sufficient to warrant the making of the order.
The court must also be satisfied, on the balance of probabilities, that the person in need of protection in fact fears the conduct above, except where that person:
- is a child or young person under 18-years-old;
- is a person with a cognitive impairment;
- has been subjected on more than one occasion to conduct by the defendant amounting to a personal violence offence, there is a reasonable likelihood that the defendant may commit a personal violence offence against the person, and the making of the order is necessary to protect that person from further violence; or
- the court is satisfied on the balance of probabilities that the person has reasonable grounds to fear the commission of a domestic violence offence against the person.

## Domestic violence offence

A domestic violence offence is an offence of the following kinds, committed by a person in a domestic relationship with, or who was in a domestic relationship with, the victim-survivor:
a) a personal violence offence; or
b) an offence (other than a personal violence offence) arising from substantially the same circumstances as those from which a personal violence offence has arisen; or
c) an offence (other than a personal violence offence) the commission of which is intended to coerce or control the person against whom it is committed or to cause that person to be intimidated or fearful (or both) (section 11(1) of the CDPV Act).
Section 11(2) of the CDPV Act specifically incorporates an offence under the Commonwealth Criminal Code into the definition of a domestic violence offence. Both the NSW child forced marriage offence and the Commonwealth forced marriage offences are prescribed as 'personal violence' offences.

From $2024,{ }^{15}$ the definition of a domestic violence offence in section 11 of the CDPV Act will include the offence relating to coercive control under section $54 \mathrm{D}(1)$ of the Crimes Act (yet to commence) and an offence in which the conduct that constitutes the offence is domestic abuse. Section 6A of the CDPV Act, which is yet to commence, will define domestic abuse as any of the following behaviours directed by one person (the first person) against another person (the second person) with whom the first person has a domestic relationship-
a) violent or threatening behaviour
b) behaviour that coerces or controls the second person,
c) behaviour that causes the second person to fear for the person's safety or wellbeing or the safety and wellbeing of others.

Section 5 of the CDPV Act provides that a person is in a domestic relationship with another person if they are, or have been:

- in a marriage;
- in a de facto partnership;
- in an intimate personal relationship;
- living in the same household;
- living in the same residential facility as a long-term resident, at the same time as the other person;
- in relationships where a person is dependent on another for ongoing paid or unpaid care;
- relatives;
- in the case of an Aboriginal person or Torres Strait Islander, part of the same extended family or kin as the other person according to the Indigenous kinship system of their culture; or
- in a marriage, de facto or intimate personal relationship with the same person (for example, a woman's ex-partner and current partner would have a domestic relationship with each other for the purposes of the CDPV Act even if they had never met).

## Grounds for making an APVO

There may be cases where a victim-survivor does not have a 'domestic relationship' with a person (or people) who are seeking to facilitate, or are involved in, a forced marriage. This may arise, for instance, where the person is a member of the victim-survivor's local or cultural community, or is a family friend, but is not a family member. In these cases, victim-survivors may be afforded protections under an APVO if there are grounds for making this order.

The grounds for making an APVO are very similar to those for an ADVO set out above, but refer to the commission of a personal violence offence rather than a domestic violence offence (section 19(1), CDPV OFFICIAL

Act). That is, the distinction between these two orders is based on the nature of the relationship between the defendant and person in need of protection. Additionally, the person must actually fear the relevant conduct, except where they are a child or are suffering from an appreciably below average general intelligence function (section 19(2), CDPV Act), which is a narrower series of exceptions than those for ADVOs noted above.

## Personal violence offence

A 'personal violence offence' is defined in section 4 of the CDPV Act by reference to a number of specified criminal offences under the Crimes Act and the CDPV Act. Relevant personal violence offences include:

- the offence of stalking or intimidation with intent to cause fear of physical or mental harm (CDPV Act, section 13)
- the NSW child forced marriage offence (Crimes Act, section 93AC)
- the Commonwealth forced marriage offence (Commonwealth Criminal Code, section 270.7B). ${ }^{16}$

## Consultation Questions

5. Do the grounds for making an ADVO effectively recognise and respond to circumstances of forced marriage? Could these grounds be further strengthened for this purpose and, if so, how?
6. Under what circumstances will individuals involved in facilitating a forced marriage not be in a domestic relationship with the victim-survivor? Do the grounds for making an APVO effectively protect victim-survivors in these cases? If not, how could these grounds better respond to the needs and circumstances of victim-survivors of forced marriage?

## Prohibitions and restrictions on behaviour imposed by an AVO

Every AVO is taken to include prohibitions against:

- Assaulting, threatening, stalking, harassing or intimidating a protected person or person with whom the protected person has a domestic relationship and
- Intentionally or recklessly destroying or damaging property or harming an animal belonging to or in the possession of a protected person or person with whom the protected person has a domestic relationship. ${ }^{17}$
In addition to these standard conditions, section 35 of the CDPV Act gives the court the power to impose any such prohibitions or restrictions on the behaviour of the defendant in an AVO as appear necessary or desirable to the court. Section 35(2A) of the CDPV Act specifically states than an AVO may prohibit any behaviour of a person that might coerce, threaten or deceive the victim to enter into a forced marriage.

The review is interested in stakeholder views on whether these provisions are adequate to protect against forced marriage.

## Provisional AVOs

Unlike the courts, the NSWPF and authorised officers do not have a general power when issuing provisional AVOs to impose such prohibitions or restrictions as appear necessary or desirable and do not have the power to impose a specific prohibition about forced marriage. Under section 35(3) of the CDPV Act, their powers are limited to making restrictions or prohibitions against the defendant about:

- Approaching the protected person;
- Accessing particular premises or places occupied or frequented by the protected person;
- Approaching the protected person within 12 hours of consuming intoxicating liquor or illicit drugs;
- Locating or attempting to locate the protected person;
- Possessing firearms or prohibited weapons; and/or
- Interfering with the protected person's property. ${ }^{18}$

In urgent circumstances where action is needed to prevent a forced marriage from occurring, it is reasonable to question whether the Police or an authorised officer should have the power to impose a specific order in a provisional AVO to prohibit behaviour that might coerce, threaten or deceive another to enter into a forced marriage.

## Interim and final AVOs

While the court can impose any restriction or prohibition on a defendant's behaviour in an AVO that it considers necessary or desirable, there is a prescribed form for application notices for apprehended violence orders that contains standard orders, and a space for other orders to be listed. ${ }^{19}$ Order 2 says that a defendant cannot contact the protected person except through a lawyer. Order 5 says that a defendant must not try to find the protected person, except as ordered by a court. Orders $7-9$ are orders about where the defendant cannot go. Order 10 prohibits the defendant from possessing firearms or prohibited weapons. Order 11 is a blank space that allows the court to draft a free text order to meet the particular circumstances of an individual matter. For example, in matters involving a risk that a victimsurvivor will be taken overseas to enter into a forced marriage outside of Australia, the Court could consider including in Order 11 a prohibition on the defendant from facilitating overseas travel for the protected person.

In its submission to the Committee, Legal Aid NSW noted that the current protections provided by AVOs do not address the biggest risk to victim-survivors, that is, their removal from Australia. ${ }^{20}$ This issue is acknowledged, noting that passports and international travel fall within the Commonwealth jurisdiction. There is provision under section 12(1)(b)(i) of the Australian Passports Act 2005 (Cth) for the States and Territories to apply to the Department of Foreign Affairs and Trade for the cancellation of a person's passport if that person is prevented from travelling internationally under a court order. In principle, at least, there may be scope for a NSW authority to apply to the Commonwealth for the cancellation of a person's passport if an AVO carries with it a condition to prevent that person from leaving Australia. Any further reforms aimed at strengthening protections against overseas travel are likely to require the Commonwealth Government's involvement.

## Commonwealth Civil Protections for Victim-Survivors

At present there are limited Commonwealth civil protections for victims-survivors of forced marriage, particularly adults. Under the National Action Plan to Combat Modern Slavery 2020-2025, the Commonwealth Government committed to develop a model for enhanced civil protections and remedies in response to the issue of forced marriage. This work is being progressed under the governance of the Standing Council of Attorneys General (SCAG). This work is outside the scope of this review.

## Consultation Questions

7. Are the existing prohibitions and restrictions that may be imposed under an AVO adequate and effective to safeguard against forced marriage? Are any changes needed to the prescribed form?
8. Should provisional AVOs be able to prohibit behaviour of the defendant that might coerce, threaten or deceive the protected person to enter into a forced marriage, as court-ordered AVOs have the power to do?

## Practice and Procedure for AVOs

Difficulties for victim-survivors in gaining access to AVO protections under the CDPV Act may arise from the practice and procedure concerning AVOs.

## Consultation Questions

9. Are there any practice changes that could be made to better support victim-survivors of forced marriage to have access to the protections under AVOs? If so, what are they?
10. Is additional guidance necessary or helpful to assist victim-survivors and support services to make use of AVOs in cases of forced marriage? If so, what should this guidance consist of?
11. Are there additional barriers for specific cohorts of the community in obtaining protections against forced marriage under the AVO system?

## Forced marriage criminal offences

Incidents of forced marriage may attract criminal charges under both Commonwealth and NSW law.

## Commonwealth offences

## Marriage Act 1961

The Marriage Act 1961 (Cth) (Marriage Act) sets out the legal age at which people can marry, the grounds on which a marriage can be void and relevant offences.

## Legal age of marriage

Section 11 of the Marriage Act provides that, subject to section 12, a person can get married if they are 18 years old or older. Section 12 provides that a person can get married when they are between 16 years and 18 years if they have sought authorisation from a judge or magistrate to get married, and the judicial officer is satisfied that there are circumstances so exceptional and unusual as to justify the order. In addition, section 14 requires consent to be obtained from a parent, guardian or a person with parental responsibility.

## Void marriages

Part 3 of the Marriage Act sets out the circumstances in which a marriage is void. Among others, these circumstances include:

- Where the consent of either of the parties was not a real consent because it was obtained by duress or fraud; or that party was mistaken as to the identity of the other party or as to the nature of the ceremony performed; or that party was mentally incapable of understanding the nature and effect of the marriage ceremony; or
- Where either party was not of marriageable age (see sections 23 and 23B of the Marriage Act).

## Offences under the Marriage Act

The Marriage Act provides protection against forced marriage in so far as it bars it from taking place. Marriage celebrants, ministers of religion and other officials have a part to play in preventing underage marriages and ensuring that they obtain real consent from both parties. The Marriage Act provides for criminal sanctions to apply to participants in a marriage ceremony, including:

- Section 95(1), which makes it an offence to marry someone who is not of marriageable age, with a criminal penalty of imprisonment for up to five years
- Section 95(2), which makes it an offence for a person to marry someone between the ages of 16 and 18 unless the necessary consents are obtained or the young person has been married before, with a criminal penalty of six months' imprisonment or five penalty units (that is, a $\$ 550$ fine).
- Section 98, which makes it an offence to witness a marriage of a young person (or "minor", that is, someone under 18 years of age) with a penalty of six months' imprisonment or five penalty units (that is, a $\$ 550$ fine).

These offences apply only to marriages in Australia.
These offences are noted for context only; they are not within the scope of this review.

## Commonwealth Criminal Code

Section $270.7 \mathrm{~A}(1)$ (a) of the Commonwealth Criminal Code defines a forced marriage as a marriage where the victim-survivor enters into the marriage without freely and fully consenting, due to coercion, threat or deception, or because the victim was incapable of understanding the nature and effect of the marriage ceremony.

Under section $270.7 \mathrm{~A}(1)(\mathrm{b})$, the marriage of a person under 16 years of age is considered a forced marriage. ${ }^{21}$ In such cases, there is no need to prove that a victim entered into the marriage due to coercion, threats or deception, or because the victim was incapable of understanding the nature and effect of the marriage ceremony.

Section 270.7B provides that it is an offence for:

- a person to engage in conduct causing someone to enter into a forced marriage (section 270.7B(1)); and
- a person who is not a victim-survivor of the forced marriage to be a party to the forced marriage, without a reasonable excuse (section 270.7B(2)).

The maximum penalty for both offences is seven years' imprisonment, or nine years if it is an aggravated offence.

Under section 270.8, offences under section 270.7B are aggravated if the victim-survivor is under 18 years old, the offender in committing the offence subjects the victim-survivor to cruel, inhuman or
degrading treatment, or if the offender engages in conduct that gives rise to a danger of death or serious harm to the victim-survivor or another person and is reckless to that danger.

A person who takes or arranges to send a child overseas to be married offshore may also be guilty of the criminal offence of trafficking in children under section 271.4(2) of the Commonwealth Criminal Code. This offence carries a maximum penalty of imprisonment for 25 years.

In the year 2021-2022, the Australian Federal Police received 84 reports alleging forced marriage offences under Division 270.7B of the Commonwealth Criminal Code. Between 1 July 2017 and 31 June 2022, approximately 23 per cent of reports alleging forced marriage offences related to persons between the ages of 16 and 18 at the time of the report. There have been no convictions recorded for the Commonwealth forced marriage offences since their establishment in 2013. ${ }^{22}$

The Commonwealth Attorney-General's Department, in collaboration with the Australian Federal Police and the Commonwealth Director of Public Prosecutions (CDPP), recently conducted a review of human trafficking, slavery and slavery-like offences in Division 270 and 271 of the Criminal Code Act 1995 (Cth) and released its final report on 22 August 2023. ${ }^{23}$ With regard to forced marriage, the final report of this review noted that the Commonwealth forced marriage offences do not capture conduct relevant to preparing for, or forcing a person to remain in, a forced marriage. ${ }^{24}$ The final report suggested that consideration be given to additional measures to address this conduct.

## NSW offences

## NSW Offence of Child Forced Marriage

On 1 January 2022, Division 17 of Part 3 of the Crimes Act commenced, which included a new offence of child forced marriage at section 93AC. Under section 93AC(2)(a), a marriage is forced if a child (defined as a person under 18 years of age) enters into the marriage without free and full consent due to the use of coercion, threat or deception or because the child was incapable of understanding the nature and effect of the marriage. Under section $93 \mathrm{AC}(2)(\mathrm{b})$, the marriage of a person under 16 years of age is defined to be a forced marriage. This definition of forced marriage in 93AC aligns with the Commonwealth forced marriage provisions under section 270.7A.

For the purpose of section 93AC, 'marriage' includes marriages recognised under the law of a foreign country or marriages that are void, invalid or not recognised by law.

Section 93AC provides for an offence where:

- a person causes a child to enter a forced marriage, and intends to cause or is reckless as to causing that forced marriage (section 93AC(3)); and
- a person enters into a marriage with a child and knows that it is a forced marriage, if they are not a victim of the forced marriage (section 93AC(4)).

Both offences have a maximum penalty of nine years' imprisonment.
While the new forced marriage offences and the associated amendments to the CDPV Act create new legislative protections for children, stakeholders have noted that there is a need for a more expansive understanding of this issue. Good Shepherd noted in their submission to the Committee that young people aged 16-18 years old represent a significant number of those at risk from forced marriage and that in their experience, people are at an increased risk of forced marriage as they get closer to 18 years old. ${ }^{25}$

Up to December 2022, there have been no finalised charges for the offence of child forced marriage under section 93AC of the Crimes Act. ${ }^{26}$ There have been no convictions under the Commonwealth forced marriage offences since their establishment in $2013 .{ }^{27}$

## Offences under the CDPV Act

The CDPV Act establishes a limited number of criminal offences.

## Stalking and intimidation offence

Section 13 of the CDPV Act provides that a person who stalks or intimidates another person with the intention of causing the other person to fear physical or mental harm commits an offence. The penalty for this offence is five years, or 50 penalty units, or both.

The offence of stalking and intimidation is applicable both where parties have a domestic relationship (classified as a domestic violence offence) and where no domestic relationship exists between parties (classified as a personal violence offence in section 4 of the CDPV Act).

The Modern Slavery Act 2018 amended the definition of intimidation to expressly cover conduct relevant to forced marriage. Section 7(1) of the CDPV Act defines intimidation to mean:

- conduct amounting to harassment or molestation;
- an approach made to the person that causes the person to fear for their safety;
- conduct that causes reasonable apprehension of:
a. injury to the person or to someone with whom they are in a domestic relationship;
b. violence or damage to any person or damage to property or harm to an animal that belongs or belonged to, or is or was in the possession of, the person or another person with whom the person has a domestic relationship; or
- conduct amounting to the coercion or deception of, or a threat to:
a. a child to enter into a forced marriage within the meaning NSW child forced marriage offence (section 93AC, Crimes Act); or
b. a person to enter into a forced marriage within the meaning of the Commonwealth definition of forced marriage (Commonwealth Criminal Code section 270.7A). ${ }^{28}$

## Offence of contravening an AVO

Under section 14 of the CDPV Act, a person who knowingly contravenes a prohibition or restriction specified in an AVO made against the person is guilty of an offence. The maximum penalty is imprisonment for two years and/or 50 penalty units.

## Consultation Question

12. Are the existing criminal offences under NSW legislation adequate and appropriate as criminal justice responses to forced marriage (noting also Commonwealth forced marriage offences)?

# Appendix A - Existing supports for victimsurvivors of forced marriage 

#### Abstract

Social supports for victim-survivors of forced marriage are outside the scope of the review and discussion paper, however, a summary of existing social supports is included below to provide additional context to the other factors impacting victim-survivors of forced marriage.

## Commonwealth

The AFP can refer victim-survivors of forced marriage to the STPP, which can provide accommodation, financial support, medical treatment, counselling and legal and immigration advice to victims of forced marriage. ${ }^{29}$ Victim-survivors willing to be part of a criminal investigation are supported by the STPP's Justice Support Scheme. This scheme provides ongoing support for victim-survivors until the investigation and prosecution is finalised. ${ }^{30}$ Victim-survivors unwilling to participate in criminal investigations can access the Forced Marriage Support Scheme, which provides up to 200 days of support for people in, or at risk of, a forced marriage. ${ }^{31}$ The decoupling of support from criminal justice processes may address some concerns that have been raised, that victim-survivors may not want to report in order to avoid subjecting their families to criminal charges. The Salvation Army's Freedom Partnership program provides support and advocacy and, in some matters, case management to people at risk of forced marriage. Anti-Slavery Australia's initiative known as My Blue Sky is a service dedicated to preventing forced marriage through their national website and the Forced Marriage helpline, providing free support to anyone at risk of forced marriage. ${ }^{32}$

The Commonwealth Government released a National Action Plan to Combat Modern Slavery in December 2020. The plan sets the strategic direction of Australia's response to modern slavery. More information about the National Action Plan is available here. As part of the National Action Plan, the Commonwealth has committed to building on supports for individuals in or at risk of forced marriage by developing a model for enhanced civil protections and remedies.

## NSW

Legal Aid NSW provides legal advice to victims-survivors of forced marriage, and in some cases, legal representation. The Early Intervention Unit (EIU) within Legal Aid NSW specialises in Family Law and Care and Protection law. EIU runs regular legal advice outreaches at community centres and local courts throughout NSW. It also provides daily duty solicitor legal support at the FCFCAs and can quickly apply for Family Law Watch List orders if a person is in imminent threat of being taken overseas for a forced marriage. Additionally, the Legal Aid NSW Domestic Violence Unit (DVU) has a pilot program in partnership with Australian Red Cross to provide integrated legal and non-legal support services to strengthen supports for women on temporary visas at risk of domestic and family violence. The scope of this project extends to victims in cases of forced marriage and provides an avenue of access to advice, information, referrals and in some cases ongoing legal representation.

Section 17 of the Victims Rights and Support Act 2013 provides that the object of the Victims Support Scheme is the provision of support for victims of acts of violence and acts of modern slavery. An act of violence is defined under section 19 to be an act or acts that occur during the commission of an offence and involve violent conduct and result in injury or death. Violent conduct is defined under section 19(3) as including 'sexual assault and domestic violence', which is defined under section 19(8). This includes under section 19(8)(f) personal violence offences committed against someone with whom the person has
a domestic relationship. As noted above, both the Commonwealth and NSW forced marriage offences are considered personal violence offences.

The Victims Support Scheme offers victims-survivors of acts of violence and acts of modern slavery counselling, financial assistance for immediate needs, financial assistance for economic loss, funeral expenses and recognition payments.

## Appendix B - Children and Young Persons (Care and Protection) Act 1998

Under section 27 of the Care Act, mandatory reporters (i.e. people who deliver services to children as part of their professional work or other paid employment, including those in management positions in organisations that deliver these services and people in religious ministries, those that provide religious based activities to children and registered psychologists ${ }^{33}$ ) are required to make a report to the Department's Child Protection Helpline where they reasonably suspect that a child is at risk of serious harm. Additionally, members of the public, including victim-survivors, can call the Child Protection Helpline to seek advice and assistance. If the Department forms an opinion, on reasonable grounds, that a child or young person is in need of care and protection, the Department can take whatever action is necessary to protect the child or young person according to section 34 of the Care Act. Such action can include the removal or assumption into care of a child or young person, with a subsequent application to the Children's Court for care orders (Care Act section 34(2)(c) and (d), sections 43-45).
Section 23(1) of the Care Act outlines the grounds for determining that a child is at risk of serious harm. The grounds that are of particular relevance to incidents of child forced marriage are:

- the child or young person's basic physical or psychological needs are not being met, or are at risk of not being met,
- the parents or caregivers of a child or young person who is required to attend school have not arranged or are unwilling to arrange for the child or young person to receive an education,
- the child or young person has been or is at risk of being physically or sexually abused or illtreated,
- a parent or other caregiver has behaved in such a way that the child or young person has suffered or is at risk of suffering serious psychological harm.

Where an individual reports a case of child forced marriage to the NSWPF, the AFP or the Child Protection Helpline, the Department is required to assess the report and take all necessary steps to ensure the safety and wellbeing of the child or young person. This may include referring the matter to the AFP, who would take carriage of any Commonwealth related aspects, including family law and immigration matters. The NSWPF is notified when a criminal offence is suspected. If the case involves allegations of child sexual abuse, serious physical abuse or serious neglect, then the matter will be dealt with by the Joint Child Protection Response Program (JCPRP). The JCPRP is a tri-agency program that involves the NSWPF, the Department and NSW Health. It provides a co-ordinated safety, criminal justice and health response to children and young people for whom such abuse is alleged.

## Cross Jurisdictional comparison of Contact conditions in Protection Orders and definitions of domestic abuse in protection order legislation ${ }^{1}$

DFV Law and Policy Unit was tasked by the Order 6 working group with comparing, across all the states and territories, contact conditions in protection orders and definitions of domestic abuse in protection order legislation. DV Law and Policy Unit has researched the protection order legislation in each state and territory as well as the template protection order application forms. The Unit, however, has not spoken with practitioners in each of these jurisdictions to ascertain how these protection orders work in practice.

DV Law and Policy team researched three questions:

- How do states' and territories' protection orders allow or prohibit contact between the defendant and the person in need of protection, particularly with regards to arrangements for children?
- Do states' and territories' protection order legislation define 'domestic and family abuse' to include a pattern of behaviour rather than a single incident?
- Is the definition of 'domestic abuse' a ground for making a protection order?

The answers to these questions is set out below. The exact wording of the relevant parts of the legislation and the protection order application forms are contained in the Excel spreadsheet "Cross Jurisdictional Analysis - Order 6-2023". This document and the Excel document should be read in conjunction with one another.

Question 1: How do states and territories' protection orders allow or prohibit contact between the defendant and the person in need of protection, particularly with regards to arrangements for children?

The courts in all the states and territories are empowered to include any conditions in protection orders which they think are necessary. Queensland is the only jurisdiction with a mandatory condition that 'the respondent must be of good behaviour towards the aggrieved and not commit domestic violence against the aggrieved'. ${ }^{2}$ NSW has three mandatory prohibitions which must be on every ADVO. ${ }^{3}$

[^32]On all protection order application forms, except for Western Australia, the applicant is asked what orders they would like the court to make. The application forms have template responses. The applicant can request a 'no contact' order prohibiting the defendant from contacting them. The applicant, in every jurisdiction but Queensland ${ }^{4}$ and Western Australia, can then request exceptions to the 'no contact order'

In NSW the optional exceptions to contact are:
(a) Through a lawyer, or
(b) To attend accredited or court-approved counselling, mediation and/or conciliation, or
(c) Ordered by this court or another court about contact with the child/children, or
(d) As agreed in writing between the defendant and the parent(s) about contact with the child/children, or
(e) As agreed in writing between the defendant, the parent(s) and the person with parental responsibility for the child/children about contact with the child/children
Note: Order 6(e) is an alternative to order 6(d). ${ }^{5}$

The table below sets out the pro forma optional exceptions to contact in protection application forms in NSW, Victoria, Northern Territory, South Australia, ACT and Tasmania

| NO CONTACT ORDER EXCEPTION OPTIONS | EXCEPTION DETAILS | NSW | Victoria | Northern Territory | South Australia | ACT | Tasmania |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| For particular events | Go to the home of a protected person in the company of a police office to collect personal property |  | $\checkmark$ (police officer or a person chosen by the applicant) | $\checkmark$ |  |  |  |
|  | At any court or tribunal hearing where the defendant is a party to |  |  |  | $\checkmark$ |  | $\checkmark$ ('during an appearance in court proceedings |

## Analysis

Across the 6 jurisdictions above, there are four main exceptions to contact, namely:

- Contact through a third party (eg: lawyer, police, counsellor, mediator/FDRP, conciliator, a named $3^{\text {rd }}$ party)
- Contact in accordance with a written agreement (eg: a written agreement, a parenting plan, a court order)
- Direct contact between the defendant and the protected person
- Contact for specific occasions (eg: collecting personal property, attending court, attending Court-appointed expert)

## Contact in accordance with a written agreement (not including court orders)

Orders 6(d) and 6(e) of the NSW AVO ['As agreed in writing between defendant and parent (and person with PR) about contact with children'] cause confusion for defendants, protected persons, police and other stakeholders alike, particularly with regards to when the agreement can take place (pre or post AVO) and whether the written agreement has to be a parenting plan or not. Contact orders in Northern Territory, South Australia and ACT specifically require a 'parenting plan' as defined in the FLA. These jurisdictions do not allow any sort of written agreement. Victoria's AVO, on the other hand, simply says "Do anything that is permitted by ...a written agreement about child arrangements". Tasmania allows contact 'in accordance with a current contact agreement reached as above' (ie: reached via direct communication between the parties or via counselling, FDR, mediation or meetings conducted by a court appointed expert)

Direct communication between defendant and protected person

In the NSW AVO application form there is no explicit provision for direct communication between the defendant and the protected person like there is in Victoria, South Australia, ACT and Tasmania. While in many cases, it may be safest not to have direct communication between the defendant and protected person, in other cases it may be safe and appropriate so that parenting arrangements and/or children's welfare can be discussed after an AVO is made. In Victoria, South Australia, ACT and Tasmania, where there is provision for direct communication, each of these jurisdictions specify 1) the mode of communication and 2) the topics that can be discussed.

## Mode of communication

In all four of these jurisdictions, the mode of communication has to be specified and it is usually in writing via email, letter or text. In Victoria and ACT verbal communication is not allowed. South Australia allows the applicant to specify any form of communication. In Tasmania there is an exhaustive list of the permissible forms of communication, ie: by letter or fax, email, electronic message, electronic messenger or social media (such as Facebook),
telephone, or an agreed $3^{\text {rd }}$ person (adult) (named)')

## What can be discussed

- Victoria: 'to negotiate child arrangements'
- South Australia: 'to facilitate access to children and to exchange information as to their welfare'
- $\mathbf{A C T}$ : 'to discuss the safety or welfare of the children or to facilitate contact handover of the children'
- Tasmania: 'only for the purposes of discussing matters arising out of their relationship, including relating to $\qquad$ (Child/ren)'

While Tasmania's provisions about what can be discussed appear very broad, ACT's seems too specific. Victoria and South Australia may present better options particularly if the communication is in written form. Generally written communication will encourage parties to be more circumspect in their communications as the written communication can be used as evidence against the writer if it is not circumspect.

Question 2: Do states and territories' protection order legislation define 'domestic and family abuse' to include a pattern of behaviour rather than a single incident?

In NSW currently the Crimes (Domestic and Personal Violence) Act 2017 (CDPVA) does not have a definition of 'domestic and family abuse' per se. It only has a definition of a 'domestic violence offence' (s 11) which refers to 73 offences in the Crimes Act 1900 (Crimes Act) and 2 offences in the CDPVA, none of which specifically refer to a pattern of behaviour except for the definitions of intimidation ${ }^{6}$ and of stalking. ${ }^{7}$

By February 2024, at the latest, there will be a definition of 'domestic abuse' in the CDPVA (s 6A) ${ }^{8}$. This definition states that domestic abuse is behaviour by one person against another person they have a domestic relationship with that is: violent or threatening; coerces or controls the other person; or causes the other person to fear for their safety or wellbeing or that of another person. The s6A definition specifies that domestic abuse may be a combination of acts, omissions, or circumstances over a period of time (in addition to single incidents). The meaning of domestic violence offence under s 11 of the CDPVA will also be amended to include any offence where the conduct is 'domestic abuse'. 9

Between February and July 2024, the Crimes Act will be amended to introduce a stand-alone offence of coercive control at s 54D ${ }^{10}$. It will be an offence for an adult to engage in a course of conduct that consists of abusive behaviours against a current or intimate partner with the intent to coerce or control. 'Course of conduct' is defined under s 54G of the Crimes Act to be engaging in behaviour repeatedly or continuously - this means the offence cannot apply to single incidents of behaviour. The s 54D Crimes Act offence will also be a domestic violence offence for the purposes of $s 11$ of the CDPVA ${ }^{11}$

[^34]Other states and territories have definitions of domestic and family abuse which have similarities to the new NSW definition of 'domestic abuse'. Only South Australia appears to refer to specific incidents, by making reference to 'acts of abuse'. Only Tasmania includes an express recognition that domestic and family violence may be both individual acts and/or a course of conduct. All other states and territories do not specifically refer to abuse as a pattern of behaviour or conduct, but use language which may be able to accommodate both single instances and patterns of behaviour. ${ }^{12}$

| Victoria | Queensland | Western Australia | Northern Territory | South Australia | ACT | Tasmania |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Term used: Family <br> Violence (s5 <br> FVPA) <br> Definition refers to behaviour | Term Used: <br> Domestic <br> Violence (s8 <br> DFVPA) <br> Definition <br> refers to <br> behaviour | Term used: Family Violence (s5A ROA) <br> Definition refers to behaviour | Term used: Domestic violence (s5 DFVA) <br> Definition refers to conduct | Term used: Domestic Abuse (s8 IO(PA)A) <br> Definition refers to individual acts | Term used: Family violence (s8 FVA) <br> Definition refers to behaviour | Term used: Family Violence (s7 FVA) <br> Definition refers to conduct and course of conduct |

## Question 3: Is the definition of 'domestic abuse' a ground for making a protection order?

In NSW, domestic abuse is not a ground for an ADVO. The grounds for making an ADVO are set out in s 16 CDPVA which requires either the person fear: the commission of a domestic violence offence against them; or engagement in conduct by the other person which intimidates or is stalking.

S 11 CDPVA defines a domestic violence offence. By February 2024, s 11 CDPVA will be amended to include any offence where the conduct constitutes domestic abuse as a domestic violence offence. When the stand-alone offence of coercive control commences, s 11 CDPVA will also be amended to read:

Domestic violence offence means an offence committed by a person against another person with whom the person who commits the offence has a domestic relationship, being -
(a) a personal violence offence, or
(b) an offence (other than a personal violence offence) that arises from substantially the same circumstances as those from which a personal violence offence has arisen, or

[^35](b1) an offence under the Crimes Act 1900 s54D(1), or
(c) an offence, other than a personal violence offence or an offence mentioned in para (b1), in which the conduct that constitutes the offence is domestic abuse.'

In all other jurisdictions, the relevant definition of domestic abuse is linked to the grounds to make a civil protection order. However, jurisdictions differ as to whether the court must be satisfied that domestic abuse has occurred, or whether fear of domestic abuse is sufficient.

# DV Strategy Fieldwork: <br> Factsheet for Frontline practitioners and <br> Managers 

## Practical application of Order 6 in ADVO matters

## Introduction

The Department is reviewing Order 6 and how it applies to domestic violence matters travelling through the NSW Criminal Justice System. Stakeholders have reported issues with the selection and application of Order 6, adjournments to negotiate a parenting agreement under Order 6(D) \& (E) and lack of clarity in what constitutes an 'agreement in writing'.

The purpose of this fieldwork process is to understand how Order 6 operates in different justice settings, varied by location. Fieldwork will take place in rural, regional and metropolitan locations and involve frontline responders from the Local Court, NSW Police Force, Legal Aid (or other relevant legal service) and the Women's Court Advocacy Service.

## Order 6 is a key intersection between criminal justice and family law

Order 6 is designed to take into account parenting orders, written agreements or the need for parties to go to mediation to reach agreement on matters affecting any children involved. The order is customised throughout the ADVO process (Provisional, Interim and Final) to meet the specific needs of the parties.

## What happens to the information you provide?

- Information provided during fieldwork will be treated with sensitivity.
- The information you tell us will be summarised into key themes.
- These key themes will inform a report on the issues with, and opportunities for reform to Order 6 practice and procedure.
- Example format of a fieldwork observation: "some police officers ask about existing family court orders. This has anecdotally improved victims' feelings of safety following a domestic violence incident."

## What is fieldwork?

- Fieldwork involves conducting an individual or focus group interview aimed at gaining the frontline perspective from you.
- Focus group interviews will ideally be with 2-3 frontline responders and managers for approximately 3045 minutes (depending on the agency).

## Facilitators

- Department of Communities and Justice, Louisa McKimm and Catherine Lambeth

## Fieldwork focus

- We know that you, as a frontline responder or manager, are best placed to understand how Order 6 is applied as part of the ADVO process. We want you to participate in a focus group interview so we can understand your role and perspective on what is crucial to improving the intersection of family law and criminal justice through the application of Order 6.
- Focus group interviews will explore questions and focus areas including:
o Can you tell us about your role and interaction with the ADVO process?
o Can you tell me about your experience of engaging with victims, perpetrators and their families around maintaining or changing parenting arrangements during the ADVO process?
o What are the main challenges and barriers to maintaining or changing parenting arrangements during the ADVO process?
o What has been done or could be done to remove these challenges or barriers?

[^0]:    Note. Courts are sorted by the number of POIs (descending). a. Some defendants may have been listed in non-trial weeks.
    b. Court joined trial part-way through review period.

[^1]:    1 This increase continued during the COVID-19 pandemic, with 34,257 final ADVOs issued between April 2020 and March 2021 , but may not be comparable due to the change in context.

[^2]:    2 The court may also specify any other conditions that are deemed necessary to protect the person(s). This can include restrictions on: where the defendant may reside; who the defendant is able to contact; and how close the defendant can be from specified individuals (after the consumption of drugs and alcohol).

[^3]:    3 The majority of interventions motivated from the psychology literature have applied exercises and techniques from cognitive behavioural therapy (e.g. see Lipsey, Landenberger, and Wilson (2007) for a meta-analysis on re-offending). MCII is drawn from the self-regulation literature, and the results from interventions from the cognitive behavioural therapy literature are not likely to be indicative of results from an MCII intervention.

[^4]:    4 As part of the co-design process with ACCSOs, it was determined that trying to randomise each individual to receive WYP would ultimately add too much
    confusion and work for the ACCSOs during the trial period.

[^5]:    5 Appendix A provides estimates using a range of cut-off values to demonstrate that the results are robust across time.

[^6]:    6 WYP was implemented in Albury, Armidale, Ballina, Batemans Bay, Bathurst, Blacktown, Bourke, Brewarrina, Broken Hill, Campbelltown, Casino, Coffs Harbour, Condobolin, Coonabarabran, Coonamble, Cowra, Downing Centre, Dubbo, Forbes, Forster, Gilgandra, Gosford, Grafton, Griffith, Kempsey, Lake Cargelligo, Leeton, Lismore, Macksville, Maclean, Moree, Moruya, Mt Druitt, Narooma, Narrandera, Narromine, Newcastle, Nowra, Orange, Parkes, Parramatta, Penrith, Port Kembla, Raymond Terrace, Tamworth, Taree, Toronto, Wagga Wagga, Walgett, Wellington, Wentworth, Wilcannia, Wollongong and Wyong Iocal courts.
    7 For all individuals where we do not observe their six month outcome, we also do not observe their twelve month outcome

[^7]:    8 This analysis was also conducted using the number of days when not in custody ('free days') rather than the days between the ADVO issue date and the breach date. We found no qualitative differences using this measure.
    9 This analysis was also conducted using only serious violence related to DV. We found no qualitative differences using this measure.
    10 Any offence where the lawpart was 65020, and they were found guilty of that offence
    11 Whether the offence was flagged as DV related, and whether they were found guilty of the offence.

[^8]:    12 The stable unit treatment value assumption involves assuming that treatments applied to one unit do not affect the outcome for another unit. 13 This approach scales the change in outcome for those allocated to WYP by the proportion of people who received the program. If we were to compare outcomes for those who received WYP and those that were allocated in business-as-usual directly, the difference in outcomes could be driven by unobserved differences between those who accepted the WYP program and those that did not.

[^9]:    14 For this analysis, we have defined this using the unbiased IV estimator under known first-stage sign proposed by Andrews and Armstrong (2017).
    15 This approach gives us a consistent estimate for the causal impact for just those that received WYP, leveraging the quasi-randomisation of the program. If we were to simply drop all individuals who didn't receive WYP and take the average outcome of those that did receive WYP (the 'per protocol' estimate), this estimate would likely be biased by those who select into receiving the WYP having a different likelihood to offend than those who do not choose to receive the program.
    16 For each of the instrumental variable estimates, we use the analogous statistical model above for both stages. In the 'first-stage' we use the instrument to predict whether the defendant receives WYP, in addition to all the covariates described above, while in the second stage we use the predicted values from the first stage in addition to all the covariates described above to estimate the treatment-on-treated.

[^10]:    ${ }^{1}$ Median (Interquartile Range) or Count (proportion) are presented in each column as appropriate
    ${ }^{2}$ Wilcoxon rank sum test; Pearson's Chi-squared test

[^11]:    17 We did estimate treatment effects by ACCSO, as well as perceived differences in enthusiasm for the program, as a robustness check. We did not find any meaningful differences.
    18 This pre-specified analysis plan was agreed upon internally, but was not registered publicly.

[^12]:    19 Although this presentation of the regression model is straight-forward to interpret, it can imply values that are not possible in practice. For example, in Figure 4, the model predicts a higher average days than there are days in the observation period, or the confidence intervals for the predictions in Figure 3 predicting negative values. These are largely a consequence of the modelling approach and the BAU group having outcomes very close to the boundaries. As these predictions are implications of our statistical model these have been left unadjusted for transparency.
    20 The estimated confidence intervals shown in Figure 3 and 5 contain negative values, something that is not possible with this outcome measure. This is a limitation of our estimation approach, but we believe that the confidence intervals still provide an accurate indication of the precision of our estimate.

[^13]:    21 For this study to distinguish between these explanations, we would need more proximate measures such as the relationship with the ACCSOs, actions taken toward avoiding a breach and/or re-offending and a closer understanding of if (and how) the WYP program altered behaviour for those who received the program. This would have considerably expanded the scope and cost of the research, as these measures would need to have been collected for the project and added considerable burden on the implementation of the study.

[^14]:    22 One way to test whether ACCSOs have become up-skilled over time in preventing breaches and/or domestic violence related offending from occurring is to look at whether these outcomes have shifted over time for defendants at these courts. We observe no meaningful differences in outcomes both across the duration of the trial or after the trial has ended.
